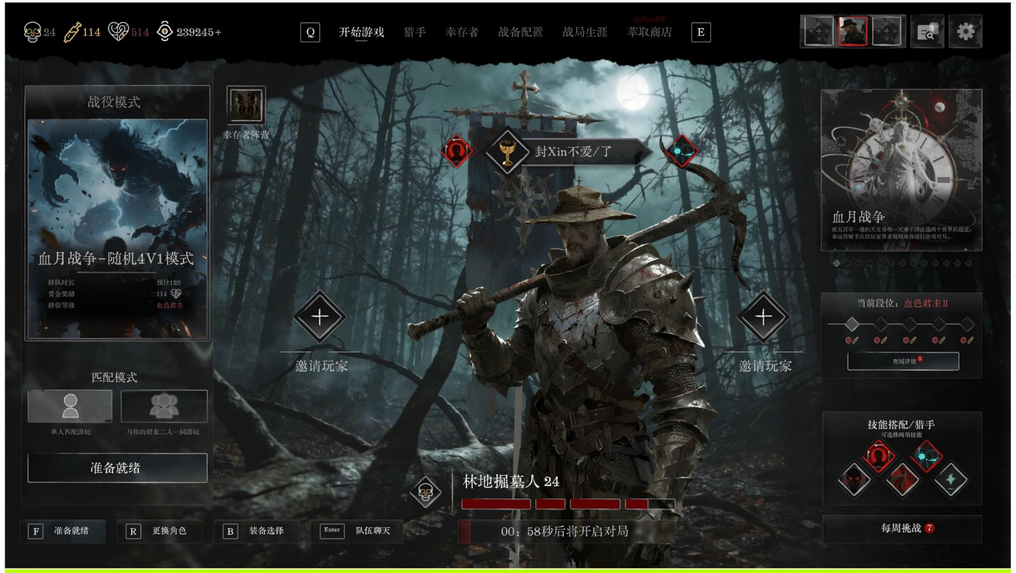
游戏交互策划UE—4V1不对称对抗黑暗主题设计《杀戮之夜》

游戏开始—等待大厅

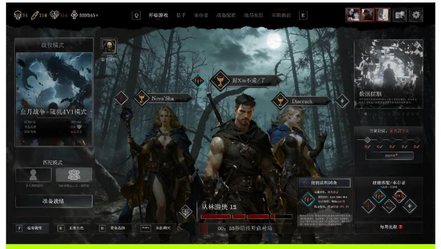


游戏开始—等待大厅

技能菜单—阵营/队友查阅

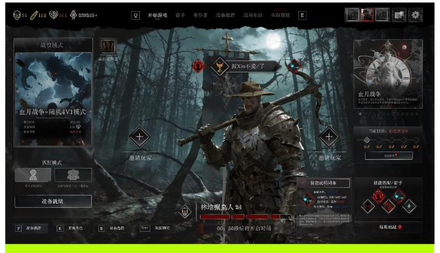
本玩法为游戏内的周期性活动，采用非对称竞技模式:1名“猎手”对抗4名"幸存者”。
玩家通过匹配进入对局，身份由系统随机分配。对局开始前，玩家可根据自身身份选择携带的技能。
对局结束后，进入结算界面，查看本局表现、积分、段位变化及奖励。请根据以下规则，完成该玩法匹配、战前准备、结算相关流程和界面设计。

猎手技能查阅1—可以装配1

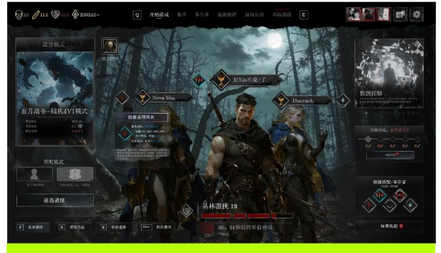


幸存者技能查阅1—可以装配1

装备/配件/工具战备界面—幸存者



技能解释说明面板—可以装配2

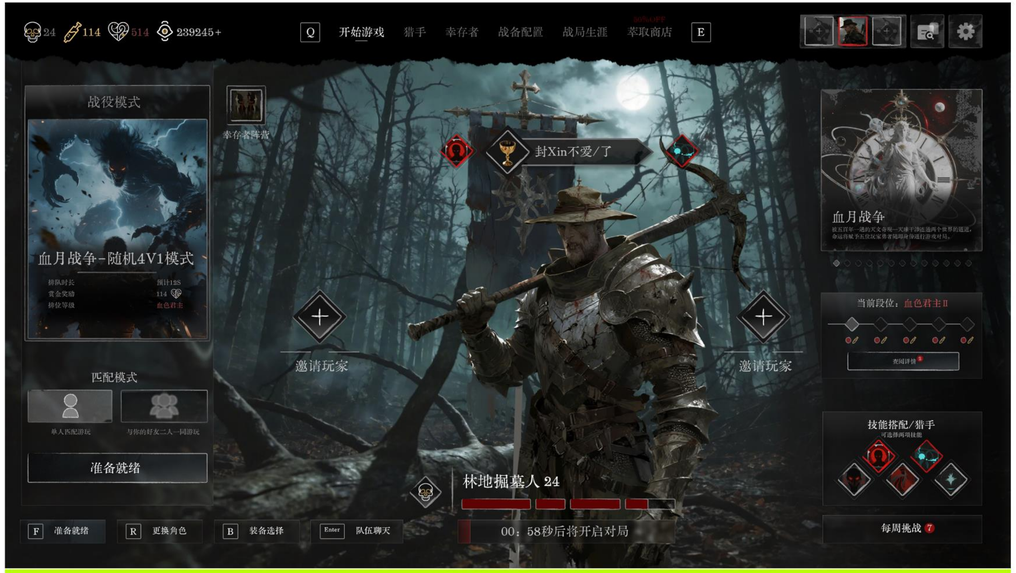


队友技能查阅

装备/配件/工具战备界面—猎手

游戏交互策划UE—4V1不对称对抗黑暗主题设计《杀戮之夜》

游戏开始—等待大厅



游戏开始—等待大厅

技能菜单—阵营/队友查阅

a) 玩家根据自身身份选择本局携带的技能。猎手可选择2个技能，幸存者可选择1个技能。

b)技能展示以下信息:图标、名称、描述、冷却时间、效果类型(如:伤害/控制/生存/破译)。

c) 同阵营玩家可以看到队友所选择的技能。

玩家完成技能选择后，需要点击准备按钮确认。准备阶段存在时间限制，所有玩家准备就绪或准备时间耗尽，游戏将自动加载并进入对局。

进入准备界面后，系统为玩家随机分配身份。界面需通过视觉元素清晰区分猎手与幸存者阵营，并展示所有玩家的基础信息(昵称、段位等)。

排位等待-倒计时和默认不操控为取消

Oasis: Design of a Multimodal Emotional Healing Interactive Device

Psychological emotional fluctuations are significant among urban populations, and mental health issues among working-age individuals have gradually become prominent—among these, the psychological stress status of the undersocialized group is particularly concerning. Multimodal interaction offers a new approach to emotional healing and boasts promising application prospects across various fields.

Through data research and simulation experiments, this paper proposes multimodal interaction design principles tailored to the target group; it also develops interaction strategies based on the Gross Emotion Regulation Process Model, and establishes interaction modes that align with the passive regulation stage and active regulation stage of emotional expression. Finally, the aforementioned principles and strategies are applied to design and develop the "Oasis" device, which aims to help the undersocialized group guide and alleviate stress, thereby providing a new solution for stress relief design.

Magnetic levitation commutator

this sandbox healing device was found to enhance the emotional healing experience, prevent emotional trauma, and help improve emotional health and quality of life.

INSPIRATION

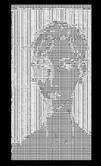
Emotional fluctuations in postmodern life

•Foreword—background

With social development, the proportion of modern people affected by mental illnesses is on the rise. Data from early 2009 indicates that in C hina, the incidence rate of various mental illnesses stands at 15%, while the prevalence rate of severe mental illnesses is 1% (with over 100 milli on patients). Approximately 30 million children and adolescents are im pacted by mental illnesses, and more than 16 million people suffer from mental illnesses and severe mental disorders, with a disability rate of 60 % and a suicide rate of 30.

•Variation—invest

Globally, 1 in 7 adolescents is diagnosed with a mental disorder, account ing for 13% of the 10–19 age group . The 2017 White Paper on Mental Hea lth of Urban Residents in China reveals that 73.6% of Chinese individuals are in a state of mental sub-health, 16.1% have mental health issues of va rying degrees, and only 10.3% enjoy complete mental health. However, s ociety devotes insufficient attention to the prevention and treatment of d epression. Since 2005, the recognition rate of depression has been below 20%, and fewer than 10% of patients have received relevant medication



•Heterization—record

Additionally, adequate exposure to green plants can reduce the incidence of depression and anxiety by 16% . Based on research into existing healing devices and the needs of people with emotional disorders, the project pro poses a product solution titled "sandbox-style nonlinear scenarios + forest city": users interact with hidden sensors in the "green space,"

•Curse—method

Arduino collects data on interaction status, intensity, and frequency to pro vide feedback. After being tested on 20 respondents in different mental sta tes,this sandbox healing device was found to enhance the emotional heali ng experience, prevent emotional trauma, and help improve emotional he alth and quality of life..

Design thinking point

In the past, because of the local culture and traditional secular ideas, people had a concrete understanding of the content of Confucianism, Buddhism and Taoism and passed on the allusions, so the belief is based on the evolution of the cultural core. Nowadays, faith has been basically deconstructed by the education popularization movement and materialist ideology, and the religious belief has also been alienated into a digital media and cultural aggregation activity - a postmodern cultural phenomenon that does not require faith and knowledge, but only needs to have a desire and can not afford to worship.

GUAN - hA method of wisdom in Zen and Buddhist schools: a method of observing, discerning, listening, speaking, seeing, essence and appearance, and developing laws of things from the outside to the inside

ZIZAI - has two meanings in Chinese semantics, literally meaning "free from bondage", so derived from "free"

WEILAI - also has two meanings in the Chinese context, literally meaning "something that has not yet happened, but its antecedents can be observed", so it is derived from "something that has not yet happened - the future"

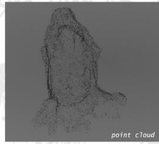
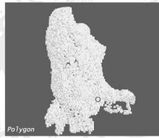
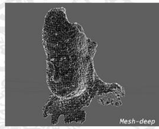
Since there is no knowledge but only a request for help, the image and features of the object of help are naturally not important







"god bless me"

A prayer of blessing without the need for piety and faith It is a deconstruction of postmodern thinking "Before the test results", "During the Test Results" "Career and Love", wait for the salvation of the Big Other in an established and defeatist landscape,and do not really trust it.

The merit of turning the sutra wheel by hand can make the sky, earth, water, fire, wind, mountains, stones, trees, trees, and sentience in the forest be come Buddhas.

TEXTURE SOURCES:

Inspired by the texture of the traditional wheel and the metal texture of the scriptures, while the conce pt of rotation and cycle as the core of the design of interactive motion trajectory

USER INTERVIEW

INSIGHT:

Based on the interaction of visiting foreign students, local dance students, seven years of art learn ing, foreign tourists, atheists, passers-by and lovers face-to-face, we can get the following enlight enment: Nowadays, people do not respect fundamentalist beliefs, but turn to a fast fashion appeal a nd experience

DESIGN SOURCES SOURCE: GOOGLE AND WIKIPEDIA

The sutras are also known as "Mash" sutras, Brahlin sutras, sutras barrels, etc., which are related t o eight-character truisms and six-character truisms (six-character Dancing mantras). Tibetan Bud dhism believes that the more the truisms are recited, the more pious the Buddha is, and the suffer ing of samsara can be removed. Therefore, in addition to chanting, people also make "Mash" sutras, and put the "Six character Great Ming Mantra" sutras in the sutras, and turn it by hand. The Tibe tan people put the scriptures in the sutras, and each rotation is equivalent to chanting the scriptu res once, indicating that the "six character Great Ming Mantra" is repeatedly chanted a hundred ti mes and a thousand times. Some people also use water power and lamp heat energy to make water cy linder and lamp cylinder respectively, and chant the "six-character Great Ming Mantra" on behalf o f people.

观 ·自在 未来

自在未来 自在未来 自在未来

View·freedom and future

PHASE 1
Metaphysical prayer

The interaction body - the input instructions and actions - dissipates

There is no reason. Why pray to God? If there is no cause, why hope?

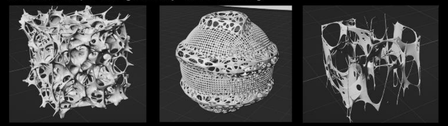
Existentialism - False Prayers - Presupposition of Failure Position - Interaction through Game Experience - Deconstruction of the Existence of the Great Other - Disenchantment

Through MESHLEB software, the Buddha statue model and design are converted into point cloud pixels, and then access TOUCHDESIGNER to set the interact ion process by preset BOTTON1-3: By generating data at the input end and g etting data feedback, the figurative Buddha statue can be split and destro yed without thinking and praying for blessing, so as to express the indepe ndence of post-modernism and self-thinking and independence of non-figurat ive belief

People always seek a virtual "big other" when they encounter difficulties or make efforts that do not match expectations, and seek excuses and rati onalizations by assuming that they will fail: failing a test, love, caree r, big decisions. In the face of these difficulties and do not make chang es and efforts at the same time, imagine a divine unit or a more powerful force group

Therefore, the interactive game designed here should be re-understood in a deconstructive way: subjectification depends on itself

BLender Graph and geometry node testing



The future - the story that has not yet happened and is about to arrive, but the so-called cause has an effect, and if we can intervene in the pr ocess and understand the process,we can both enter the new future and th e established fact.

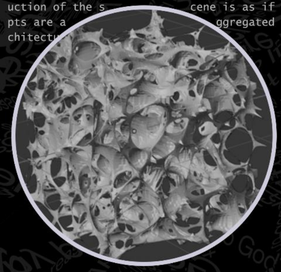
card 3

card 1

Interactive card

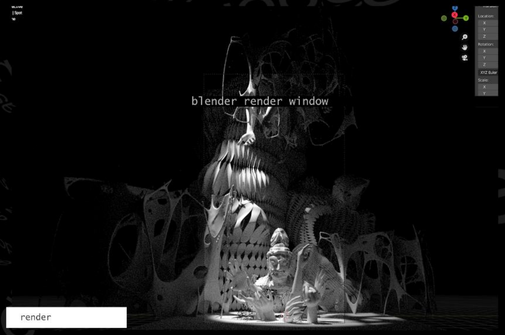
In the East Asian religious teaching system, especially in the Buddhist teachings originating from the South Asian subcontinent, the shape and posture of "gesture" are particularly powerful for practical and educational significance, especially with some gestures as a subtext for some guidance and practice. Therefore, in the card design and element extraction, the hand itself will be used as a close-up content to express its profound meaning, while taking into account the semiotic connotation.

In Confucianism, Buddhism, Taoism, Zen and Buddhism, the most important form of expression and carrier of knowledge is: "the full range of poems, books, pictures and scriptures", and the method of conception in the design and construction of the s cene is as if wisdom and concepts are a ggregated into abstract architectu



The characteristics of thought extension, like "GEO volume", divergence and convergence, are also an important source of the design scenes and elements, bionic nature: virtual faith and worship

Presentation drawing--Construction of scene elements and models



Gesture - sign language - can be either a simple gesture or a vehicle for many actions and emotions. Gesture can also be a carrier and narrative medium, and the state of gesture can also be derived into a language, a doctrine, and a perception.

LAST TWO:
Dynamic text design

LAST THREE:
Inspiration design

This design comes from the post-modern background, people begin to deconstruct their subjective cognition, turn to a new cognitive position of "the big other", habitually submit to some kind of defeatism and opportunism, give up and face up to their own efforts, and turn to some kind of "blessing and good luck". I hope to use this design to persuade people to re-value their own development and independence.

Interaction / Emotional feedback / Therapeutic Mechanism

HEART SOURCE · SYMBIOSIS · FUTURE

Based on the interactive experience of emotional problems in the post-epidemic period and experiential design for unknown crises and development opportunities

At present, human beings live in a digital society, and human communication is increasingly dependent on mobile phones,Computers and other technical equipment. Through Look, Noisy, Smelly, Tasty, Feely, Touchy and other concepts,I want people to pay more attention to their feelings. This does not mean to reject technology, but to provide a return to nature option."

The American writer Nicholas G. Carr wrote in the July/August 2008 issue of The Atlantic Monthly. In The Atlantic Monthly, he wrote "Is Google Making Us Stupid?" (Is Google Making it Us Stupid?) This article, pain analysis of their own and the Internet generation due to excessive reliance on search engines to solve problems caused by the brain retreat The process of transformation. In addition, he has written extensively about the negative effects of automated machines on the human body and brain, and the scientific community It has also been proved that, affected by environmental factors, the overall level of human intelligence has declined since 1975.

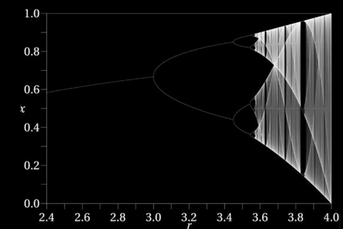
Conway's Game of Life
Complexity exploration

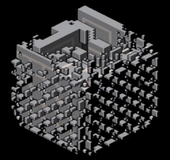
NO 02

The Game of Life is a cellular automaton invented by British mathematician John Horton Conway in 1970. It was first published in Scientific American magazine in October 1970 by Martin Gordenner Gardner, 21 November 1914-22 May 2010. Martin Gardner) The "Mathematical Games" column appeared.

The rules of the game of life In the game of Life, each grid cell can have one of two states: dead or alive. HP The game is controlled by four simple rules that are applied to each grid in the simulation domain Units:

Ordered chaotic bifurcation diagram (μ value)





And the game, just like the random and diversified development of human life groups, can also come from far away Long, or destroyed, and the chance of survival depends on the lay out and mathematical awareness of the experiencer

Underpopulation, outpopulation: If a living cell has fewer than two living neighbors, it will die.
Normal: A living cell with two or three living neighbors can survive into the next generation.
Overpopulation, over-competition: a living cell with more than three living neighbors dies.
Reproduction: If a dead cell happens to have three living neighbors, it will be resurrected.

BORN新生的数字化城市规划

01 剧本开篇起始，即在生命起源之地与主要体量的巨型建筑之间的关系

02 The War of Machine and Magic 战争结束过后的站群已经逐渐脱离和露出了地表，由于过度战争破坏了绝大多数的基表环境，人类与剩尔生物部分已经全部转移到空中建筑“巴别塔”之上，作为完全新型部署，建立于新的政权体系之下，人与人之间也勉强维持产生了新式“平衡”，介于人群定位诞生的新式附属权力也由此开始。

在希伯来语中“巴别”是“变乱”的意思，于是这座塔就称作“巴别塔”。也有人将“变乱”一词解释为“巴比伦”,称那座城叫“巴比伦城”称那座塔叫“巴比伦塔”而在巴比伦语中,“巴别”或“巴比伦”都是“神之门”的意思。

The War of
Machine and Magic
战争结束过后的站群已经逐渐脱离和露出了地表，由于过度战争破坏了绝大多数的基表环境，人类与剩尔生物部分已经全部转移到空中建筑“巴别塔”之上，作为完全
新型部署，建立于新的政权体系之下，人与人之间也勉强维持产生了新式“平衡”，介于人群定位诞生的新式附属权力也由此开始。

BORN

לבב לדגמ O

在希伯来语中“巴别”是“变乱”的意思，于是这座塔就称作“巴别塔”。也有人将“变乱”一词解释为“巴比伦”,称那座城叫“巴比伦城”称那座塔叫“巴比伦塔”而在巴比伦语中,“巴别”或“巴比伦”都是“神之门”的意思。

“提亚马特”核心区

燃料推进区

自2024年后战争后,人类经历战争达成其识,例以争取部分分化居住在巴别塔顶层,例之“提亚马特”和反,人多数人留存地表居住,简称之为“盖塔特”自大战前强胜利之后的文化存留,也仅仅剩下数字图片。存留下来的人们也只能发明新的文字用以交流。好奇和圣经故事里的巴别塔相反。也有可能,已经没有人还记得是经到底记录看什么了/

CHAPTER TWO: Forest Breath/ Water Drop Dream Journey 2

A drop of water , is designed and written to come from the deep sea, run to the lan d, and explore the perspective of lakes an d rivers in the land

Sea of Flowers/HUA HAI

The water drops came to the **sea** of flowers

Water **vapor** and splash

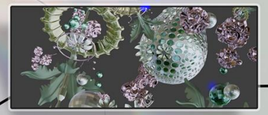
Is it the new **end** of this journey?

Water Drop: buds

Initial point 2-1

The starting point of the second stage of the journey, from the beginning of the birth of a green grass and light and shadow staggered by the water and land grass ring

Time turbulence 2-2



Water droplets swim in the time of grass plants, becoming dew droplets, moving from a new perspective to a new change

Water body and variation

Recombination of elements 2-3

Swaying, swaying, the tiny droplets of water that dispersed in the air like spores turned into fog

Flower language

Light homing 2-4

self-restraint

The language of flowers is also the hymn of plants to the drops of water on their journey

The **way** of the world is like a poem,

A drop of **water.**

Cross the road to find the **end** of time.

Deconstructed Audio Station

Futuristic interaction
Modular deconstruction
Eetro industrial aesthetics

Retro-Modern Audio Hub

In the era of digital music, physical CDs have gradually become a carrier of nostalgia, yet independent musicians still need accessible tools for physical creation and distribution.The market lacks an all-in-one device that caters to both the needs of nostalgic playback and on-the-spot burning; users have to switch between multiple devices, resulting in a fragmented experience.

Inspiration

Exploring the new vitality of physical music in the digital age, through the integration and deconstructionist visual expression of "play + burn" functions, redefining the interaction mode between humans and physical audio.

play burn

Background

In the era of digital music, physical CDs have gradually become a carrier of nostalgia, yet independent musicians still need accessible tools for physical creation and distribution.

The market lacks an all-in-one device that caters to both the needs of nostalgic playback and on-the-spot burning; users have to switch between multiple devices, resulting in a fragmented experience.

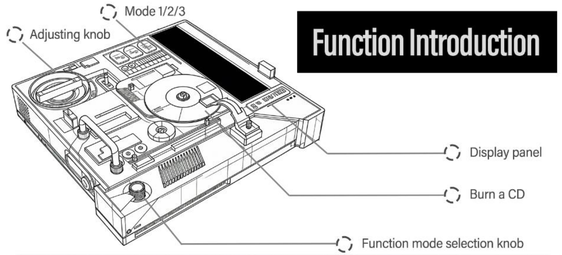
Key Features

1. Dual-function core: The CD playback unit supports lossless audio output, and the burning module can directly convert digital audio into physical CDs, meeting the closed-loop requirements from listening to creation.
2. Modular interaction: Using a layered deconstruction visual language, the interactive elements such as knobs and buttons are independently formed into blocks, with intuitive operation and mechanical aesthetic appeal.
3. Multi-scenario adaptability: Targeted at independent musicians and retro audio enthusiasts, it can be used for live performances, personal creation and collection display.

Detail

Retro-Modern Audio Hub

Function Introduction



Use the illustration

The target users are those who have both recording and playback needs in one device. For example, the recording function can be used outdoors, and the frequency can be ea sily adjusted. The other aspect is that these products have long been dominated by HiFi enthusiasts and hardcore players. The learning curve is too steep, making it inconvenien t for children and beginners who want to freely record.

Introduction

In the digital music era, physical CDs carry nostalgia, yet independent mus icians need practical tools for creation and release. This all-in-one device i ntegrates CD playback and burning with modular design.

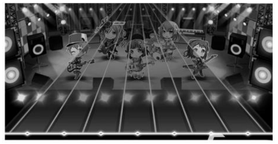
It supports lossless audio and converts digital files to physical CDs, forming a complete listening and creation experience. Blending retro industrial aest hetics and intuitive interaction, it brings coherence and ritual to physical m usic for creators and enthusiasts.

Background research

The scene is set indoors

The software for teenagers to create music has a high entry barrier.

Music knowledge cannot be customized.



The music software has shifted from being specialized to being gamified.

User analysis

- EQ Speaker
- Free recording
- Simple Learning of Music
- Free query
- Portable
- Can not leave the room.

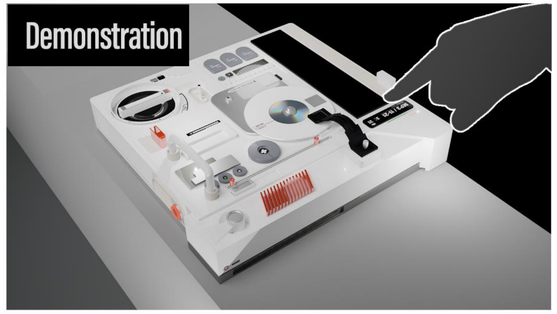
match colors



Demonstration

Retro-Modern Audio Hub

Integrating retro industrial aesthetics with futuristic interaction, we make the listening and creation experience of physical music coherent and ritualistic again.

Retro-Modern Audio Hub

Interaction

CD playback and free burning

You can freely use standard pointers and players. You can add short discs and CDs to directly record and produce physical content from the program's MP3 files, and also use the built-in optical drive to play music. The body is equipped with a total of four sets of microphones that can freely capture sound. This enables users to easily and cost-effectively get started and freely record sounds that are difficult to capture in daily life - with an integrated AI system that filters out background noise and reduces noise.

Frequency modulation operation knob

With the infinitely adjustable knob, simple physical interaction can achieve the following functions: volume adjustment, EQ adjustment, frequency loudness, mode selection, and extreme functions. More advanced features can be realized through OTA (Over-The-Air) technology. The preset functions are extremely simple and easy to learn and master.

Operational interaction

Color and pointer indicators for guidance

DETAIL-SPLITTING

Design specification

To explore the design of age-appropriate experience and the use function, interaction mode and product form of product linkage.

Physical button | Custom | Multi-Function for Aging smart devices

Propose and design a set of conceptual products and a complete graphical interface linkage design to simulate and improve the happiness index of the target group

Enhance tactile experience and interaction

Age-related macular degeneration is a common chronic disease that causes visual impairment, blurry central vision, or blind spots. Although it has little effect on peripheral vision,

Color giving and research

However, impaired central vision affects the patient's ability to read, make, and recognize objects, and hides the product's design language to enhance contrast and color relationships as a starting point.Under the premise of high-contrast black and white, it is easy to identify orange, bright red, green, etc. which are active in the light wave color relationship, and it is easy to match the use of skin-friendly materials

Touch id and camera

Button
Screen
Knob

User pain point

The difference in the situation of physical disorders will be relatively large, the cervical spondylosis is more common in the elderly group, and the peripheral nerve compression disease caused by long-term drug use, etc., in the process of product use, there will be the following obstacles:

Finger trembling leads to limited flexibility: it takes longer to click a button, and the clickable area of the same action control requires more; The decline in palm strength leads to unstable holding: the elderly tend to be large-screen, and the weight of large-screen mobile phones makes the elderly need to use more strength to hold, and cannot be used continuously for a long time.

Elder-helper

Dietary assistance in the context of 『aging』 Improvement and integrated design

● Design for aging: Food universal care

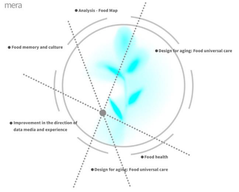
For the elderly population: under the scenario of weakening the senses, through the linkage of equipment - strengthening the flavor and flavor of the characteristic food culture, and combining the premise of food culture protection, the rationality of the diet and healthy ingredients of the aging population are better supplemented, avoiding to meet the taste and ignore the comprehensiveness of nutrition, and avoiding the need to sacrifice the food culture and taste to meet the health.For the elderly population: The visual expression and auxiliary design of the normal nutrition intake and life problems of the elderly, which are affected by the deterioration of the five senses, especially the sense of smell and taste, and the comprehensive factors of hand movement ability and touch ability. On this basis, the intelligent products are connected with the living environment of the population in this environment, and the design and improvement are assisted by APP.

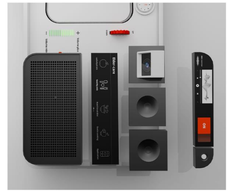
Limb weakening - Cooking - eating - digestion -The combination and eating habits are not reasonable

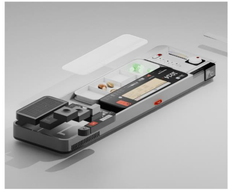
Customized food service and healthy food flavor butler for every middle-aged and elder group

● Enhances haptic operation-voice input

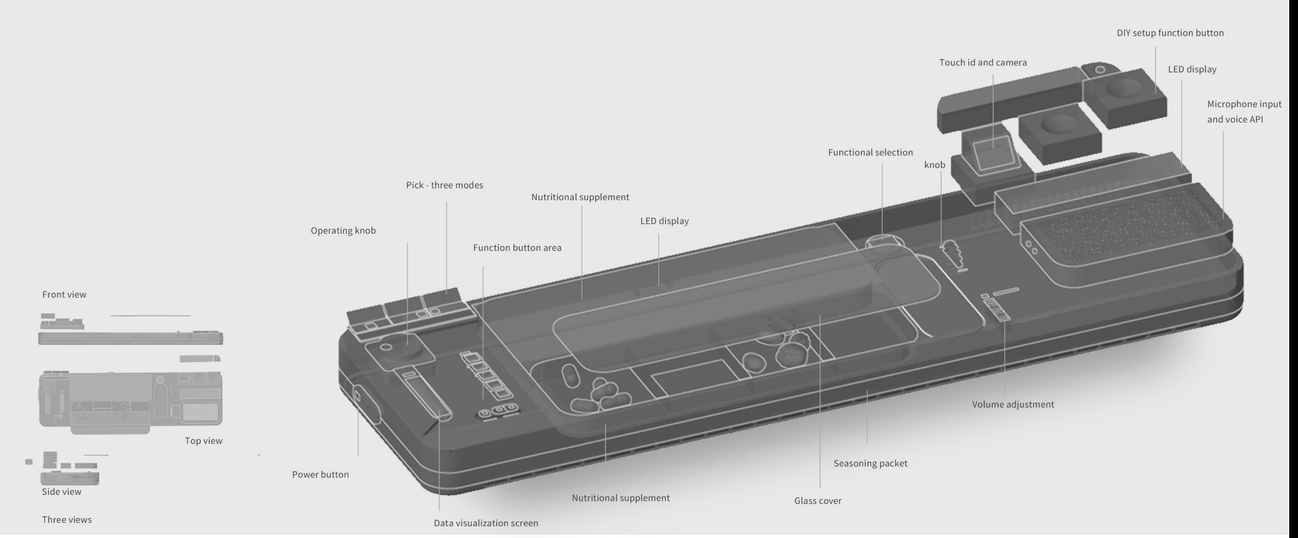
On the one hand, middle-aged and elderly people have a series of weakening phenomena in hearing, smell, taste and vision, resulting in a lot of inconvenience in life situations such as food preparation, material preparation, flavor seasoning, material component control and recognition. Based on this, the design will focus on high-contrast design to improve recognition, and retain physical keys to facilitate blind exercise for elderly people after they have some operating experience. After daily food, blood nutrition, blood pressure and blood glucose health index detection by the camera



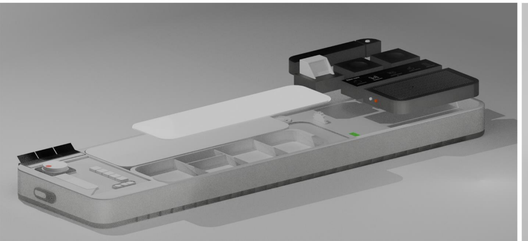


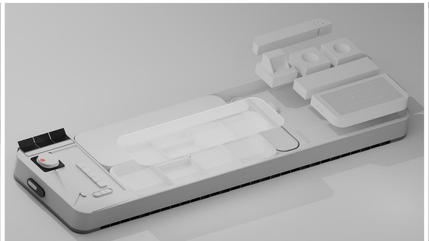


Glass Metal Plastic Alloys and Coatings



Conceptual products and complete graphical interface linkage design are designed to simulate and improve the happiness index of the target group: reducing unnecessary information entropy, strengthening visual and auditory design tools and complementing tactile physical contact experience as the core, focusing on the sensory, emotional and visual experience required in aging, but also becoming a part of the feedback life experience.





04:趣味反馈和色彩可用性调研

基于被调研群体画像的生活背景调研中获得的启发

- **Inspired by the life background research based on the portraits of the surveyed groups**

尽管生活中或者面临驱动不方便和谢如帕金森的并发症影响，还有肢体和反应能力下降造成的生活不便利，但是从生活的角落和生活娱乐的自留地中找到了一篇旨野——老龄群体仍然有一片自己娱乐和维持快乐和思维迅捷的快乐地——老年棋牌室。
通过触觉，视觉色彩匹配，肌肉记忆，在诸多不便下仍然可以保持正常打麻将的节奏和循序反应游戏胜算和天平的倾斜，给予本设计较大灵感启发。

Despite the inconvenience of living or facing driving and complications such as Parkinson's disease, as well as the inconvenience caused by the decline of limbs and reaction ability, there is a wilderness found in the corner of life and the private land of life and entertainment - the elderly group still has a happy place for their own entertainment and maintenance of happiness and rapid thinking - the elderly chess room.
Through the touch, visual color matching, muscle memory, in many inconveniences can still maintain the normal rhythm of playing mahjong and reflect the game odds and the tilt of the balance, giving this design greater inspiration.

Human in the loop， HITL 人机回环

AI的“智能”不仅来源于训练数据，还包括人类的反馈。所以一个重要的问题是人和机器学习算法彼此交互来解决问题的正确方式是什么。呼吁设计以 Human 为中心的系统，比如：在 HITL 界面添加模型解释线索，不仅能提高反馈质量，也能提高人类的效率。

Wu X, Xiao L, Sun Y, et al. A survey of human-in-the-loop for machine learning[J]. Future Generation Computer Systems, 2022, 135: 364-381.

目前 human-ai collaboration 领域的前沿探索

Three Gaps in Digital Mythology Exploration

神话文化数字探索的三重断点

现有平台通常将神话压缩为故事目录或单次问答，却难以支持文化语境理解、证据核验与持续调查。

Existing platforms often reduce mythology to story catalogs or one-off answers, leaving context, evidence, and user inquiry disconnected.

01 CONTEXT GAP

语境断裂

故事被切离地域、时期与文化关系

Stories are detached from place, time, and cultural relations.

按国家、人物或类型浏览时，文化关系被拆散；
用户看到的是内容条目，而不是完整文化语境。

02 EVIDENCE GAP

证据断裂

**解释与来源、文化立场和不确定状态脱节，
用户难以验证、比较或重新判断。**

Interpretations become difficult to verify or revise.

"Different versions suggest the character changed during cultural transmission..."
"不同版本说明角色在传播中发生了变化……"

03 AGENCY GAP

文化能动性缺失

ONE QUESTION DOES NOT PRODUCE ONE ANSWER — IT OPENS A TRACEABLE CULTURAL INQUIRY.

一次提问不是终点，而是可追溯文化调查的起点。

Evidence-Grounded Cultural Interpretation

有据可查的文化解释

Every interpretation remains linked to its sources, historical period, and cultural position—open to verification, comparison, and revision.

Agent 的每一次解释都保留档案来源、历史时期与文化立场，使用户能够验证依据、比较观点并重新修正判断。

TRACE THE INTERPRETATION
追溯解释依据

01 Question / 调查问题
后世记载为何不同？

02 Agent perspective / 角色视角
孙悟空 · 华夏语境

03 Archive evidence / 档案材料
3 records · 2 periods / 3 条材料 · 2 个时期

04 Historical context / 历史语境
Region · Period · Source / 地域 · 时期 · 来源

05 Case state / 案例状态
Contested · Under investigation / 争议中 · 调查中

EVIDENCE → PERSPECTIVE → INTERPRETATION → RECHECK
证据 → 视角 → 解释 → 复核

TRACE / 追溯

CULTURAL AGENT RESPONSE / 文化角色回答
Current Myth Case / 当前调查案例

REGION / 地域 · PERIOD / 时期 · UNDER INVESTIGATION / 调查中

为什么后世记载中的孙悟空形象不同？
Why do later accounts portray Sun Wukong differently?

孙悟空 / Sun Wukong
Cultural perspective · Huaxia context / 文化角色视角 · 华夏语境

PROVISIONAL INTERPRETATION / 阶段性解释
不同版本并不是对同一形象的简单重复。角色变化与叙事受众、宗教语境及其在不同时期承担的文化功能有关。
Later versions do not simply repeat one stable image. Their differences reflect changing audiences, religious contexts, and the cultural functions the character performs across historical periods.

This is one situated perspective—not a final conclusion.
这是基于特定文化位置的解释，而不是最终结论。

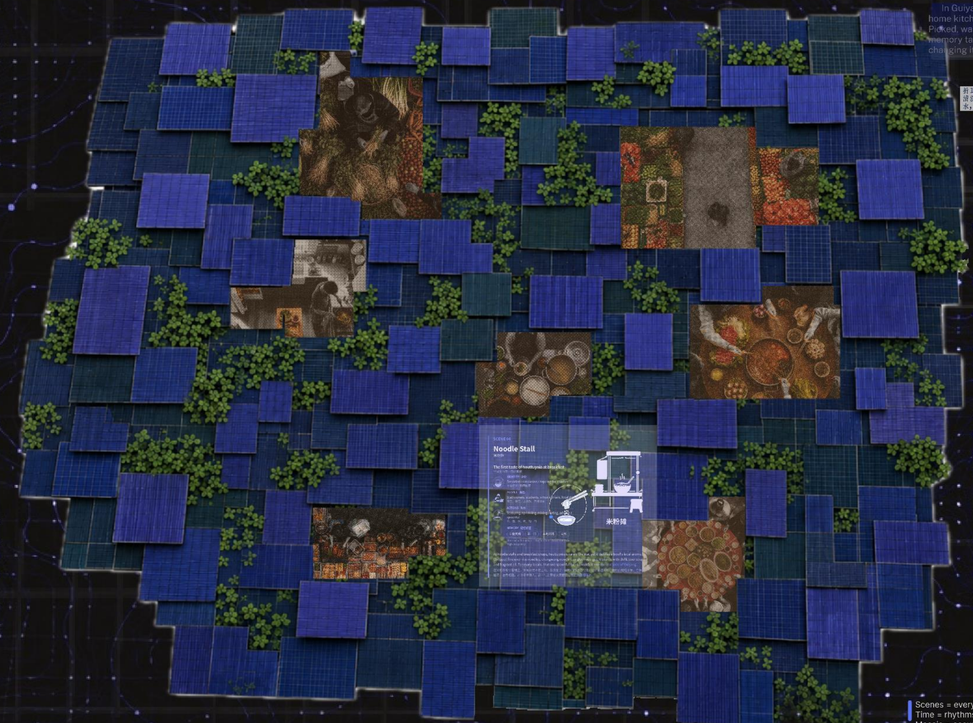
MEMORY | Urban Food Scenes and Everyday Memory of Houttuynia in Guiyang

一根折耳根的城市记忆



SCENE 01

Market Day

Country produce enters the city

IDENTITY 身份

Road-front produce / point of entry into circulation

RHYTHM 节奏

Vegetable farmers, tourist-goers, mid-vendors, buyers

ACTIONS 动作

Unloading, picking, weighing, bagging

MEMORY 记忆锚点

The market has a low-hanging roof that shelters it from rain. Piles of vegetables and produce still carrying soil and moisture. People pick the tender roots, ask prices, and weigh them out—summing the township's seasons of vegetables home, and bringing the mountain's freshness into the city's table.

赶场的时间是从5点到7点，大约两个半小时左右。你会看到菜农从车上卸货，人们在地摊前挑菜、砍价、称重，将乡间的时间带回城市，也将城市的节奏留在乡间的集市。

赶场集市

SCENE 02

Wet Market

菜市场

An everyday ingredient in the city's daily bustle

IDENTITY 身份

Fresh ingredient / agricultural-tourism vicariously

RHYTHM 节奏

Stallholders, household shoppers, local residents

ACTIONS 动作

Picking, buying, weighing, bargaining

MEMORY 记忆锚点

Agriculture, Restaurants, Stalls for Sale

In Guiyang's wet markets, houttuynia is a high-frequency everyday ingredient. Sold as bundles alongside green vegetables and fresh meats, it's also often displayed in small, shallow bowls—a familiar streetscape at a glance. Shoppers judge the roots' freshness while planning the 'wild-vibe' dish or home-cooked meal.

在贵阳的菜市场里，鱼腥草以成束或小碗的形式摆放，是极为常见的日常食材。菜贩们一边称重一边聊天，顾客则在挑选的同时，已经在脑海里盘算着今晚是凉拌还是炒一盘家常菜。

菜市场

SCENE 03

Home Kitchen

家庭厨房

From fresh root to home cooking

IDENTITY 身份

Home-cooking ingredient / side dish on the table

RHYTHM 节奏

Home cooks, partners, grandparents, children

ACTIONS 动作

Washing, cutting, mixing, stir-frying, boiling, re-heating

MEMORY 记忆锚点

In its home kitchen, houttuynia starts from "produce just bought" into a home-cooking ingredient. Rinsed, cut short, tossed with chili and a range of regional add-ons—pork fat, to smart fills the air of the home. It is not just an ingredient but a family flavor made, cooled, and remembered again and again.

在家庭厨房，鱼腥草从“刚买回来的菜”变成了家常菜。洗净、切短、加入辣椒和各种地方性的调味——猪油、腊肉或折耳根，香气会先充满整个屋子。它不仅仅是食材，更是一代代家人反复制作和记忆的家味。

家庭厨房

Scenes = everyday food encounters
Time = rhythms from market to night
Mosaic = accumulated urban memory
场景 = 日常饮食相遇
时间 = 从市场到夜晚的城市节律
拼贴 = 累积的城市饮食记忆

Scenes, Roles, and Food Identities in Guiyang's Everyday Street Eating 贵阳市井饮食中的场景、角色与食物身

In Guiyang, houttuynia is more than a dish. It enters through the markets and reappears again and again — in home kitchens, at rice-noodle stalls, around the hotpot table, over night-market grills, at festival banquets. Picked, washed, cut, dipped, shared: each gesture is both everyday eating and a moment where the city's memory takes shape. Shifting from fresh produce to dipping sauce to the taste of home, houttuynia keeps changing its identity — and keeps deepening the way Guiyang remembers itself through food.

折耳根在贵阳市井饮食中的场景、角色与食物身份

折耳根在贵阳市井饮食中，并不是单一的菜品。它从菜场进入厨房，又在米粉铺、火锅桌、夜宵烧烤和节庆宴席中反复出现。采、洗、切、蘸、分享：每一次动作，既是日常吃饭，也是城市记忆被一次次唤起的过程。从菜场到餐桌，从早餐配菜到夜宵烧烤，从重庆鱼到贵阳窑罐菜单，折耳根在不同场景中不断改变身份，也不断加深着别人对城市的认识方式。

SCENE 04

Hotpot Table

火锅桌

The lethal heart of the dipping saucе

IDENTITY 身份

Hotpot dipping sauce / accounting that suits

RHYTHM 节奏

Evening, late night, midnight, among crowds

ACTIONS 动作

Picking up, tossing, mixing, using wooden chopsticks

MEMORY 记忆锚点

Spicy base · Soup base · Dipping sauce · Ingredients

火锅桌

A fanged and sour soup gathering, houttuynia is one of the dipping sauce ensemble. With chilli, garlic, spring onion, and a tangy or boldly rich base, it becomes the high-flavor right to cut through hotpot. Ask each server "Let the green and the fish be cut a spicy sauce, and bring the cleanest bowl."

SCENE 05

Night Grill

夜宵烧烤

The grease-cutting companion of late-night food

IDENTITY 身份

Late-night snack, food, savory seasoning

RHYTHM 节奏

Late night, after work, gathering, drinking

ACTIONS 动作

Grilling, brushing, dipping, pairing up, sharing

MEMORY 记忆锚点

Skewers · Beer · Late-night snacks · Friends

夜市烧烤

In the night market, houttuynia is more of an umami switch. It shows up in a leaf for use dipping dish, or going down with smoking, bbq, grill, and grilled meat, lemon, chili sauce, and as the tertiary and sour-tongue, nuts in salt. Light eating will just chill stomach but also refreshingness — it runs together, eating and offers.

SCENE 06

Noodle Stall

米粉铺

The first taste of houttuynia as everyday

IDENTITY 身份

Noodle dipping sauce / accounting that suits

RHYTHM 节奏

Morning, noon, evening, late night

ACTIONS 动作

Picking up, tossing, mixing, using wooden chopsticks

MEMORY 记忆锚点

Spicy base · Soup base · Dipping sauce · Ingredients

米粉铺

A fanged and sour soup gathering, houttuynia is one of the dipping sauce ensemble. With chilli, garlic, spring onion, and a tangy or boldly rich base, it becomes the high-flavor right to cut through hotpot. Ask each server "Let the green and the fish be cut a spicy sauce, and bring the cleanest bowl."

SCENE 07

Festival Banquet

节庆宴席

The fadeout home brought to the table

IDENTITY 身份

Festival, a carnival of hospitality

RHYTHM 节奏

Festival, Lunar, Spring Festival, Mid-Autumn Festival, Dragon Boat Festival, Qingming Festival

ACTIONS 动作

Cutting dishes, pouring bowls, serving food, socializing, sitting round

MEMORY 记忆锚点

Ancestors · Old New Year tables · Mothers · Grandmothers · Children · Relatives

节庆宴席

At banquets and New Year tables, houttuynia is in various forms in an ice cream, and it often is given "like a beef bowl." Cold-tossed, stir-fried with sliced pork, or served as a dipping dish or bites, it brings the refreshing herbal aroma into a feast-all reunion. — Pairing the bitter-rich part of a flavor of fruit is a beautiful combination of flavor.

在贵阳的一日之间，折耳根从不只属于一个地方。它从一开始就跟着人的手，一路经过竹篮、碗盆、砧板和火锅桌，最后又在节庆宴席上重新聚在一起。

折耳根 · 贵阳一日物质载体

Houttuynia — Material Carriers of a Guiyang Day

Inscribed by vessels: to trace fishmint through its containers is to trace a city through its habits. 以器之名，追踪折耳根即在一座城市一日里的物质轨迹

HOW TO READ · 读图方式
Ray = time period · 辐射分支 = 日内时段
Node = material carrier · 节点 = 盛放/处理折耳根的器物
Center = Houttuynia · 中心 = 连接各场景的折耳根
Times mark representative daily moments, not measured activity peaks.
时间为代表性的日常叙事节点，并非实测活动峰值。

Across a single Guiyang day, one root never travels alone; it passes from hand to hand through the vessels that hold it. Baskets and scales at dawn, bowls and condiment trays at midday, enamel basins and cutting boards at home, hotpots and dipping dishes at dinner, grills and takeaway boxes deep into the night.
Each ray represents a time period, each node represents an object, and at the center lies the ingredient that brings them all together to form a constellation.

在贵阳的一日之间，折耳根从不只属于一个地方。它从一开始就跟着人的手，一路经过竹篮、碗盆、砧板和火锅桌，最后又在节庆宴席上重新聚在一起。清晨的竹篮与秤杆，正午的粉碗与调味盘，家中的搪瓷盆与砧板，晚餐的火锅与蘸碟，直至深夜的烤架与打包盒。每一道射线是一个时刻，每一个节点是一件器物，中心是将它们汇聚成一座城市日常的那味食材。

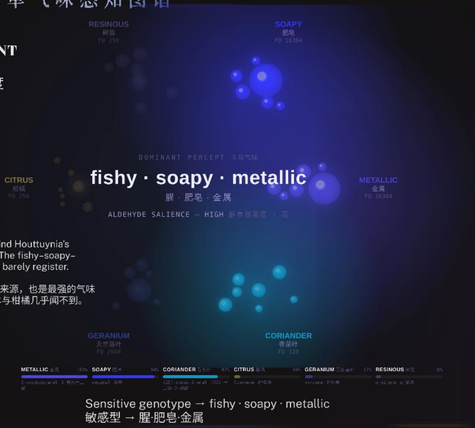
SENSE | A sensory map of houttuynia's odor perception

鱼腥草气味感知图谱

ONE STIMULUS — DIFFERENT RECEPTOR SENSITIVITIES
同一组气味分子 · 不同嗅觉敏感度

Houttuynia gives off many smells, and its signature note comes from a handful of aldehydes. The molecules are always the same — but people don't perceive these aldehydes alike. What you smell depends on how sensitive your nose is to them: sensitive people more readily catch the fishy, soapy, metallic notes, while less-sensitive people pick up citrus, herbal, and resinous ones instead. One and the same plant — but what's smelled is the person.

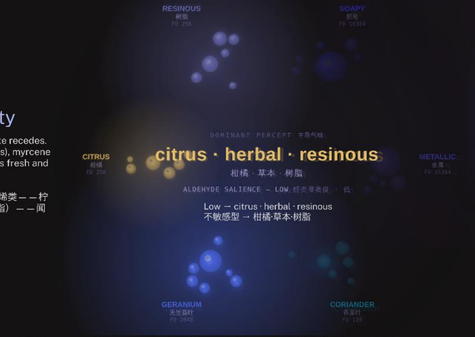
鱼腥草散发着多种气味，其标志性气味源自几种醛类化合物。分子始终相同，但每个人对这些醛的嗅觉感知并不一致——感知到的气味，取决于鼻子对醛类的敏感程度：敏感的人更容易闻到腥、肥皂、金属般的气味，不敏感的人则更多闻到甜柚、草本、树脂的气息。同一株鱼腥草，闻到的却是不同的人。



High aldehyde sensitivity

Strongly tuned to 3-oxododecanal, the aldehyde behind Houttuynia's signature note (the most potent odorant, FD 16,384). The fishy–soapy–metallic family dominates; the green and citrus notes barely register.
醛敏感 · 强
对 3-氧代十二醛高度敏感 — — 它正是鱼腥草标志气味的来源，也是最强的气味分子（FD 16384）。腥 – 肥皂 – 金属家族占主导，草本与柑橘几乎闻不到。

Sensitive genotype → fishy · soapy · metallic
敏感型 → 腥·肥皂·金属

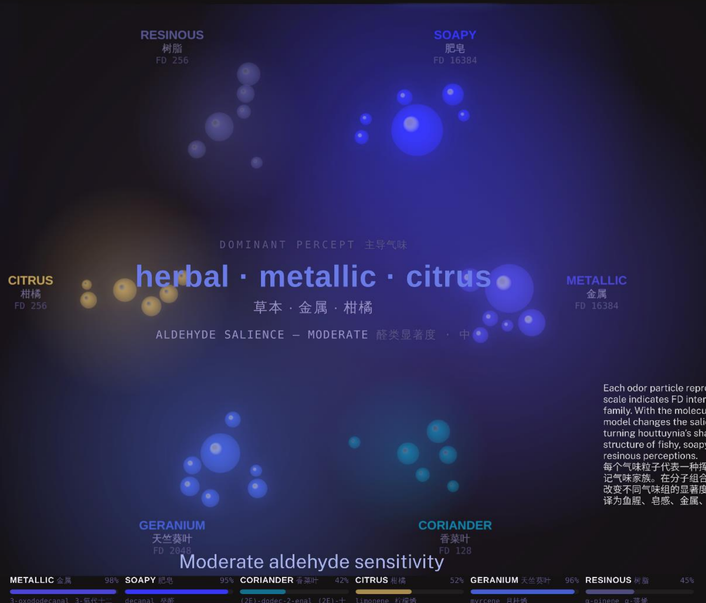


Low aldehyde sensitivity

Little response to the aldehydes, so the fishy note recedes. What remains are the terpenes — limonene (citrus), myrcene (geranium-leaf) and α-pinene (resinous) — read as fresh and green rather than fishy.

对醛类反应很弱，腥味因此退到背景。留下的是萜烯类 — — 柠檬烯（柑橘）、月桂烯（天竺葵叶）、α-蒎烯（树脂）— — 闻起来清新、草本，而非鱼腥。

Low → citrus · herbal · resinous
不敏感型 → 柑橘·草本·树脂



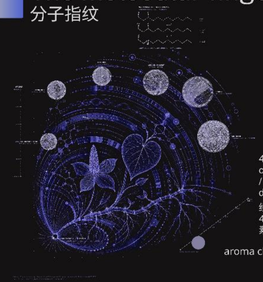
Moderate aldehyde sensitivity

Moderate → herbal · metallic · citrus
中间型 → 草本·金属·柑橘

The aldehyde note and the terpene notes register at similar levels. The fishy edge is present but no longer dominant — geranium-leaf, metallic and citrus sit side by side, with no single odour taking over.
醛类气味与萜烯类气味强度相当。腥味仍在，却不再压倒性主导 — — 天竺葵叶、金属、柑橘并列出现，没有任何一种气味独占。

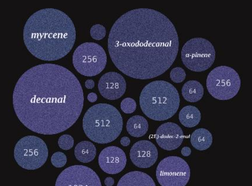
Each odor particle represents one volatile compound. Its scale indicates FD intensity, and its color marks the odor family. With the molecule set fixed, the receptor-sensitivity model changes the salience of different smell groups, turning houttuynia's sharp and layered odor into a visible structure of fishy, soapy, metallic, herbal, citrus, and resinous perceptions.
每个气味粒子代表一种挥发性成分，尺度表示 FD 强度，颜色标记气味家族。在分子组合保持不变的前提下，嗅觉敏感度模型改变不同气味组的显著度，由此将鱼腥草尖锐而复合的气味转译为鱼腥、皂感、金属、草本、柑橘与树脂等可见结构。

The molecular fingerprint
分子指纹



44 odour-active compounds, resolved by comparative aroma extract dilution (cAEDA / GC-O). 3-oxododecanal (houttuynin) dominates.
经比较气味提取稀释分析（cAEDA / GC-O）解析出的 44 种气味活性分子，主角是 3-氧代十二醛（鱼腥草素）。

aroma character



Houttuynia cordata · odour molecules · disc size = FD (flavour-dilution factor)
鱼腥草气味分子 · 圆圆积 = FD 维矜因子

From molecule to perception
从分子到感知

ODOR FAMILIES
气味家族

Herbal 草本	Mint · Cilantro · Grass · Leaf	薄荷、香菜、青草、菜叶
Metallic 金属	Rust · Iron-water · Blood	铁锈、水腥味、血腥感
Fishy 鱼腥	River fish · Wet mud · Water weed	河鲜、湿泥、水草
Citrus 柑橘	Lemon peel · Sour · Cooling	柠檬皮、酸味、清凉感
Soapy 皂感	Soap · Detergent · Cilantro-soap	香皂、洗涤感、香菜香皂感
Resinous 树脂	Woody · Medicinal · Bitter	木质、药草、苦香

Houttuynia cordata's odor is not one attribute but several co-occurring notes. "Fishy" is named most often (38%), followed by metallic (22%) and herbal (16%), with citrus, soapy, and resinous making up the rest.
鱼腥草的气味并非单一属性，而是多种气味的叠加。其中"鱼腥"被提及最多(38%)，其次为金属(22%)与草本(16%)，柑橘、皂感、树脂占其余。

基于水的禅意

Zen based on water-- Symbolic critical design

CHAPTER 1:“水无常形”的定义解析

水

源 泛 沥 汐 沸 冰 凝 碱 凛 凋 烈

《道德经》：上善若水，水利万物而不争

《跃迁》：水顺流而下，遇石则跃，遇弯则折、遇洼则漫、遇到悬崖则飞身跃下，粉身碎骨又立即重汇

H_2O D_2O

泰勒斯：水是万物的本原。万物皆产生于水，水是生命之源。

水，准也。准，平也。天下莫平于水。——《释名》

水曰清濑。——《礼记·曲礼》

去来江口守空船，绕船月明江水寒。——唐· 白居易

水礼（果饵等礼物）；墨水；口水；泪水；药水；汽水

水宿（星座名。古代天文学家对北方列星七宿的总称）

水虞（古代官名。掌管川泽的政令）；水官（掌管治水、征收鱼税的官）

五行：一曰水，二曰火，三曰金，五曰土

在网络上形容一个人说话、做事没有技术含量时使用

无力买田聊种水，近来湖面亦收租

贴水；扣水；汇水；水丝（成色低劣的银子）

水曰清濑。——《礼记·曲礼》

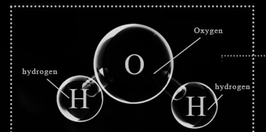
冰，水为之，而寒于水。——《荀子·劝学》

积阴之寒气为水。——《淮南子·天文》

最简单的氢氧化合物，化学式H2O。
无色、无味、无臭的液体，在标准大气压（10132
帕斯卡）下，冰点0℃，沸点100℃，4℃时密度最大，为1克/毫升。

- 化学（内部）
- 形而上哲理
- 物理（外部）
- 状态和变化（可塑）
- 常态状态（非可塑）

1. 一种无色无味的透明液体
2. 泛指某些液态物
3. 江、河、湖、海的通称
4. 额外收入或附加费用
5. 马虎；不负责
6. 纯水导电性十分微弱，属于极弱的电解质
7. 超临界水



水
H_2O

流：

流水是指流动的水，如：落花流水春去也。另指像流水一样的动态过程

“ 肆彼流水，朝宗于海。”

——《诗·小雅·沔水》

静：

静水：象征着为人处世不张扬，态度柔和静，就是生命的完满，水，就是生命的本源；流，就是生命的体现；深，就是生命的蕴藉。

——《道德经》

清：

北山烟雾始茫茫，南津霜月正苍苍。

——《寒夜怀友杂体二首》

龙蛇寒下笪，雾露昼多阴。

——《酬桂林从叔》

瘴江昏雾连天合，欲作家书更断肠。

——《江亭》

内外

造景 尺度 作造 比例

动静对比 流水 静水 自然

节奏与韵律 快慢

自然与人工 灵韵 巧夺 锤炼

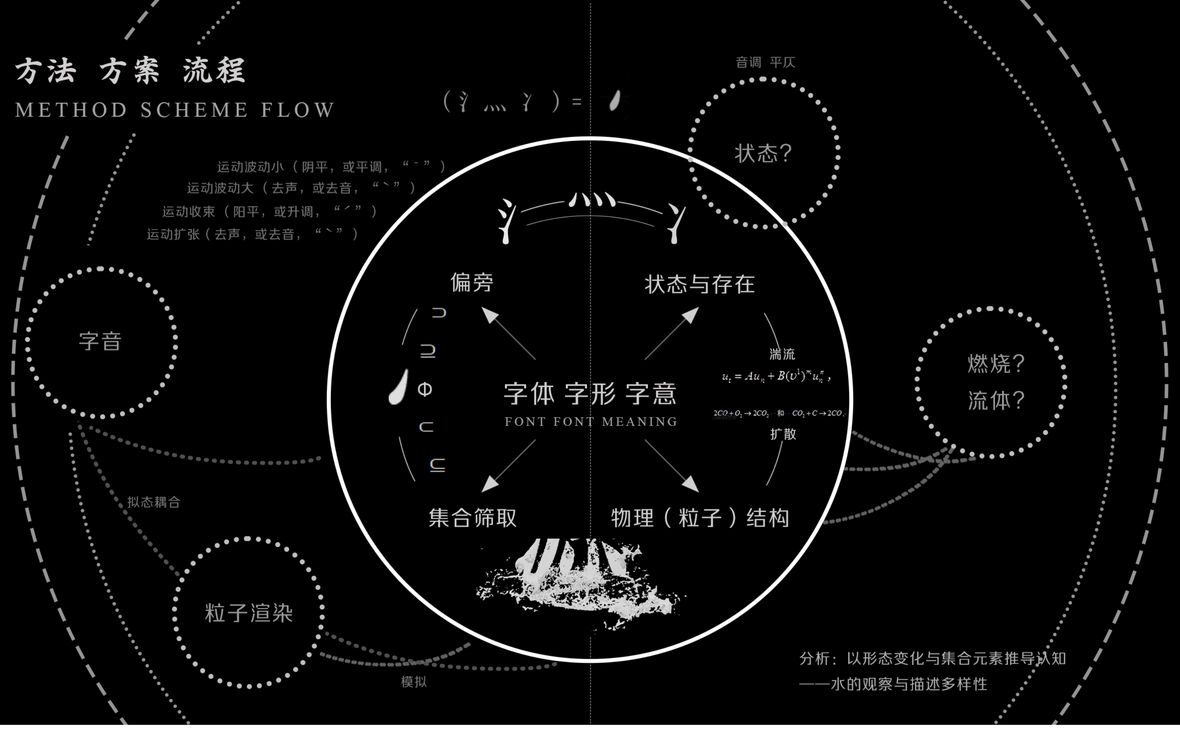
QUIET, SUCH AS MIRROR, MAPPING

清

ATOMIZING, ETHEREAL, DISPERSING



基于水的禅意
——符号性思辨设计

Zen based on water-- Symbolic critical design

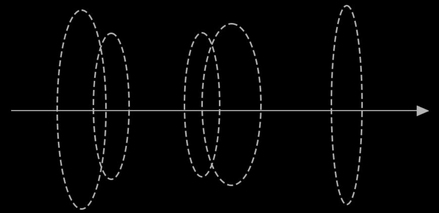
CHAPTER 2 :关于水的禅意的离散与主体

提取方法

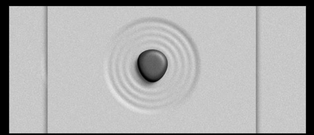
METHOD RESEARCH IDEALISM

该如何为其定义呢？
水者，无色、无味、亦无形也。
它是化学式 H2O。是物理世界里气态的水蒸气、固态的冰，以及自然界中的云雨雾、江河湖；它也是英文单词WATER，是覆盖在地球表面成分最多的物质，是维持我们人类和其他物种赖以生存的生命之源。

原有含义过于丰富：用以避免理解歧义和冲突
设计以丰富含义词库的理解进行升维和复合转换以可视化设计



对水的禅意的设计思维研究与方法论---多维度文化符号可视化设计



方法再设计--以水的禅意为核心的集合思想

A与非A，离散和主体，广义和狭义，存在与意识
是与不是，对应与误判，集合与子集，第一性的异同
提取源自对水复杂和多元条件下生成的自然哲理与形而上理论方法进行可视化转变与再设计，作用与后工业时代和信息时代的多媒体设计

$$D_3 = \begin{vmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \\ a_{31} & a_{32} & a_{33} \end{vmatrix}$$

①将第一、二列平移到行列式右侧
②如图做出六条斜对角线
③对角线上的元素相乘，红色相加的和 减去 蓝色相加的和

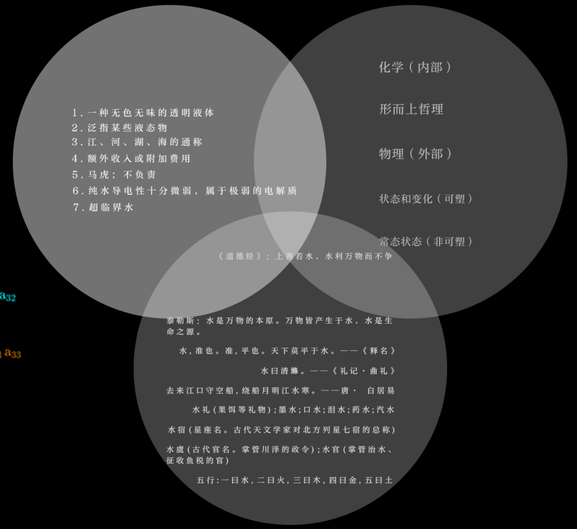
$$\begin{bmatrix} a_{11} & a_{12} & a_{13} & a_{11} & a_{12} \\ a_{21} & a_{22} & a_{23} & a_{21} & a_{22} \\ a_{31} & a_{32} & a_{33} & a_{31} & a_{32} \end{bmatrix}$$

$D_3 =$

$a_{11}a_{22}a_{33} + a_{12}a_{23}a_{31} + a_{13}a_{21}a_{32}$

$-a_{13}a_{22}a_{31} - a_{11}a_{23}a_{32} - a_{12}a_{21}a_{33}$

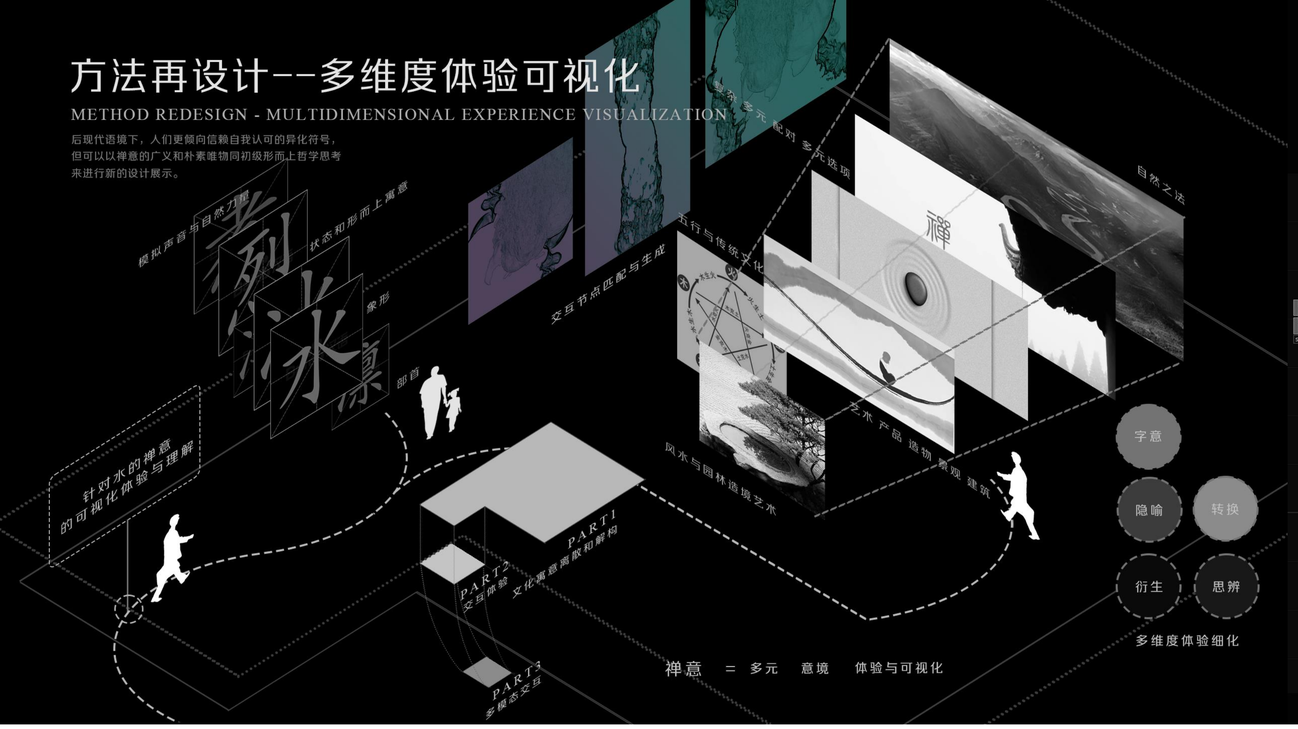
即为：
方法论：数学行列式计算方式+
世界观：禅意的大集合思想
= 数字设计产出



方法再设计--多维度体验可视化

METHOD REDESIGN - MULTIDIMENSIONAL EXPERIENCE VISUALIZATION

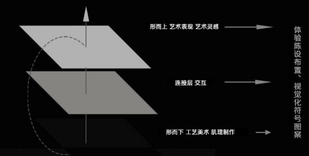
后现代语境下，人们更倾向信赖自我认可的异化符号，
但可以以禅意的广义和朴素唯物同初级形而上哲学思考
来进行新的设计展示。



方法再设计--多维度体验可视化

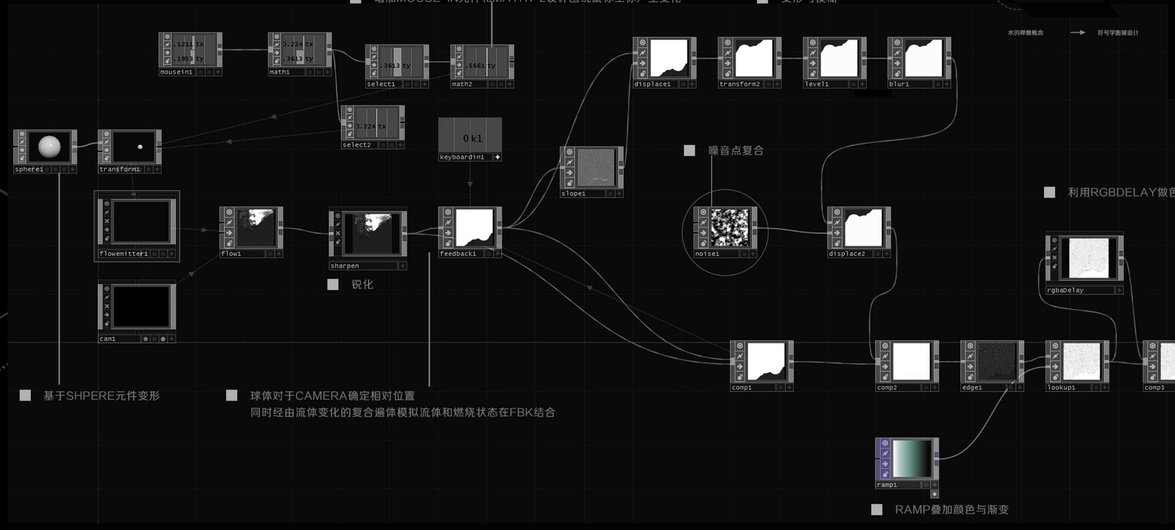
METHOD REDESIGN - MULTIDIMENSIONAL EXPERIENCE VISUALIZATION

■ 运用TOUCHDESIGN技术分析和产出可视化效果



■ 增加MOUSE-IN元件和MATH1-2设计围绕鼠标坐标产生变化

■ 变形与模糊



■ 噪音点复合

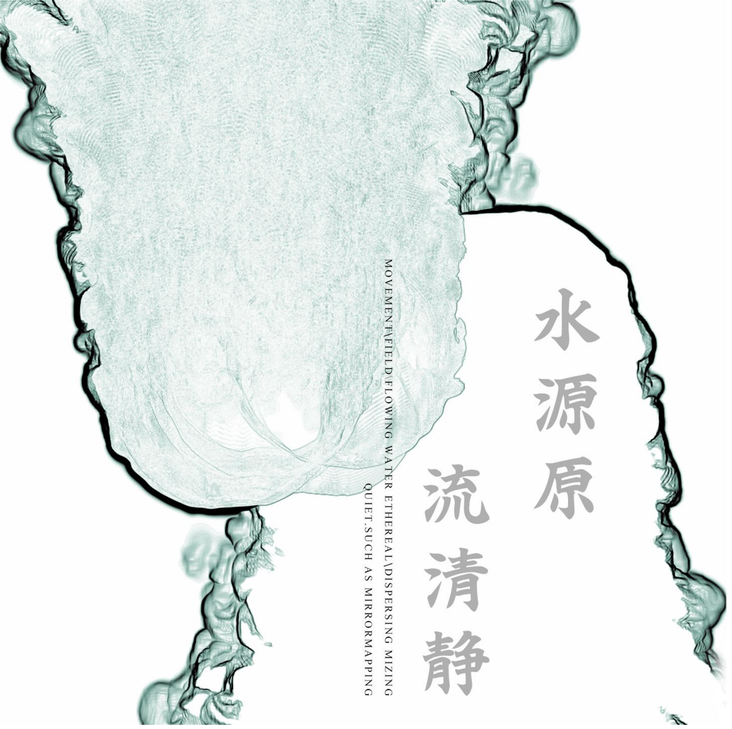
■ 利用RGBDELAY做色散效果

■ 锐化

■ 基于SHPERE元件变形

■ 球体对于CAMERA确定相对位置
同时经由流体变化的复合遍体模拟流体和燃烧状态在FBK结合

■ RAMP叠加颜色与渐变



《道德经》：上善若水。水利万物而不争

《庄子·外物》：水涸则徙而下，遇石则跃，遇弯则折，遇洼则漫，遇到悬崖则飞身跃下，粉身碎骨又立即重汇

泰勒斯：水是万物的本原。万物皆产生于水，水是生命之源。

水，准也。准，平也。天下莫平于水。——《释名》

水曰清瀵。——《礼记·曲礼》

去来江口守空船，绕船月明江水寒。——唐·白居易

水礼（果饵等礼物）：源水；曰水；沮水；泲水；汽水

水宿（星宿名。古代天文学家对北方列星七宿的总称）

水虞（古代官名。掌管川泽的政令）；水官（掌管治水、征收鱼税的司）

五行：一曰水，二曰火，三曰木，四曰金，五曰土

在网络上形容一个人说话、做事没有技术含量时使用

无力买田聊种水，近来湖面亦收租

贴水；扣水；汇水；水丝（成色低劣的银子）

水曰清瀵。——《礼记·曲礼》

冰，水为之，而寒于水。——《荀子·劝学》

积阴之寒气为水。——《淮南子·天文》

生成与毁灭。万物作为现象，则有其生成与毁灭。而水作为本体，则无生成与毁灭，只要变化。

万物虽然千变万化，其本则一，最终都来自于水，最终都复归于水。

形而上学三原则：甲逻辑，乙词型，丙语义：

水是万物的本原——亚里士多德《形而上学》

本体与现象。若水为本体，则万物为现象。

逻辑：水=种<属=物质 取自然的一种，来表达自然本原。这里有种属，水这一种类属于自然；又有等同，水是（自然的）本原。

西方

实在论

水

形而上

东方

时间不同，则神韵各异，可为四季之雨，可为清晨之露

不争不抢，不辩不论；宁静无声，处之泰然。

水之形状，置之于圆形容器则圆，置之于方形容器则方。

舍与得

方与圆

环境不同，则形状不同，可成水滴，可成瀑布，亦可成大海。

柔与刚

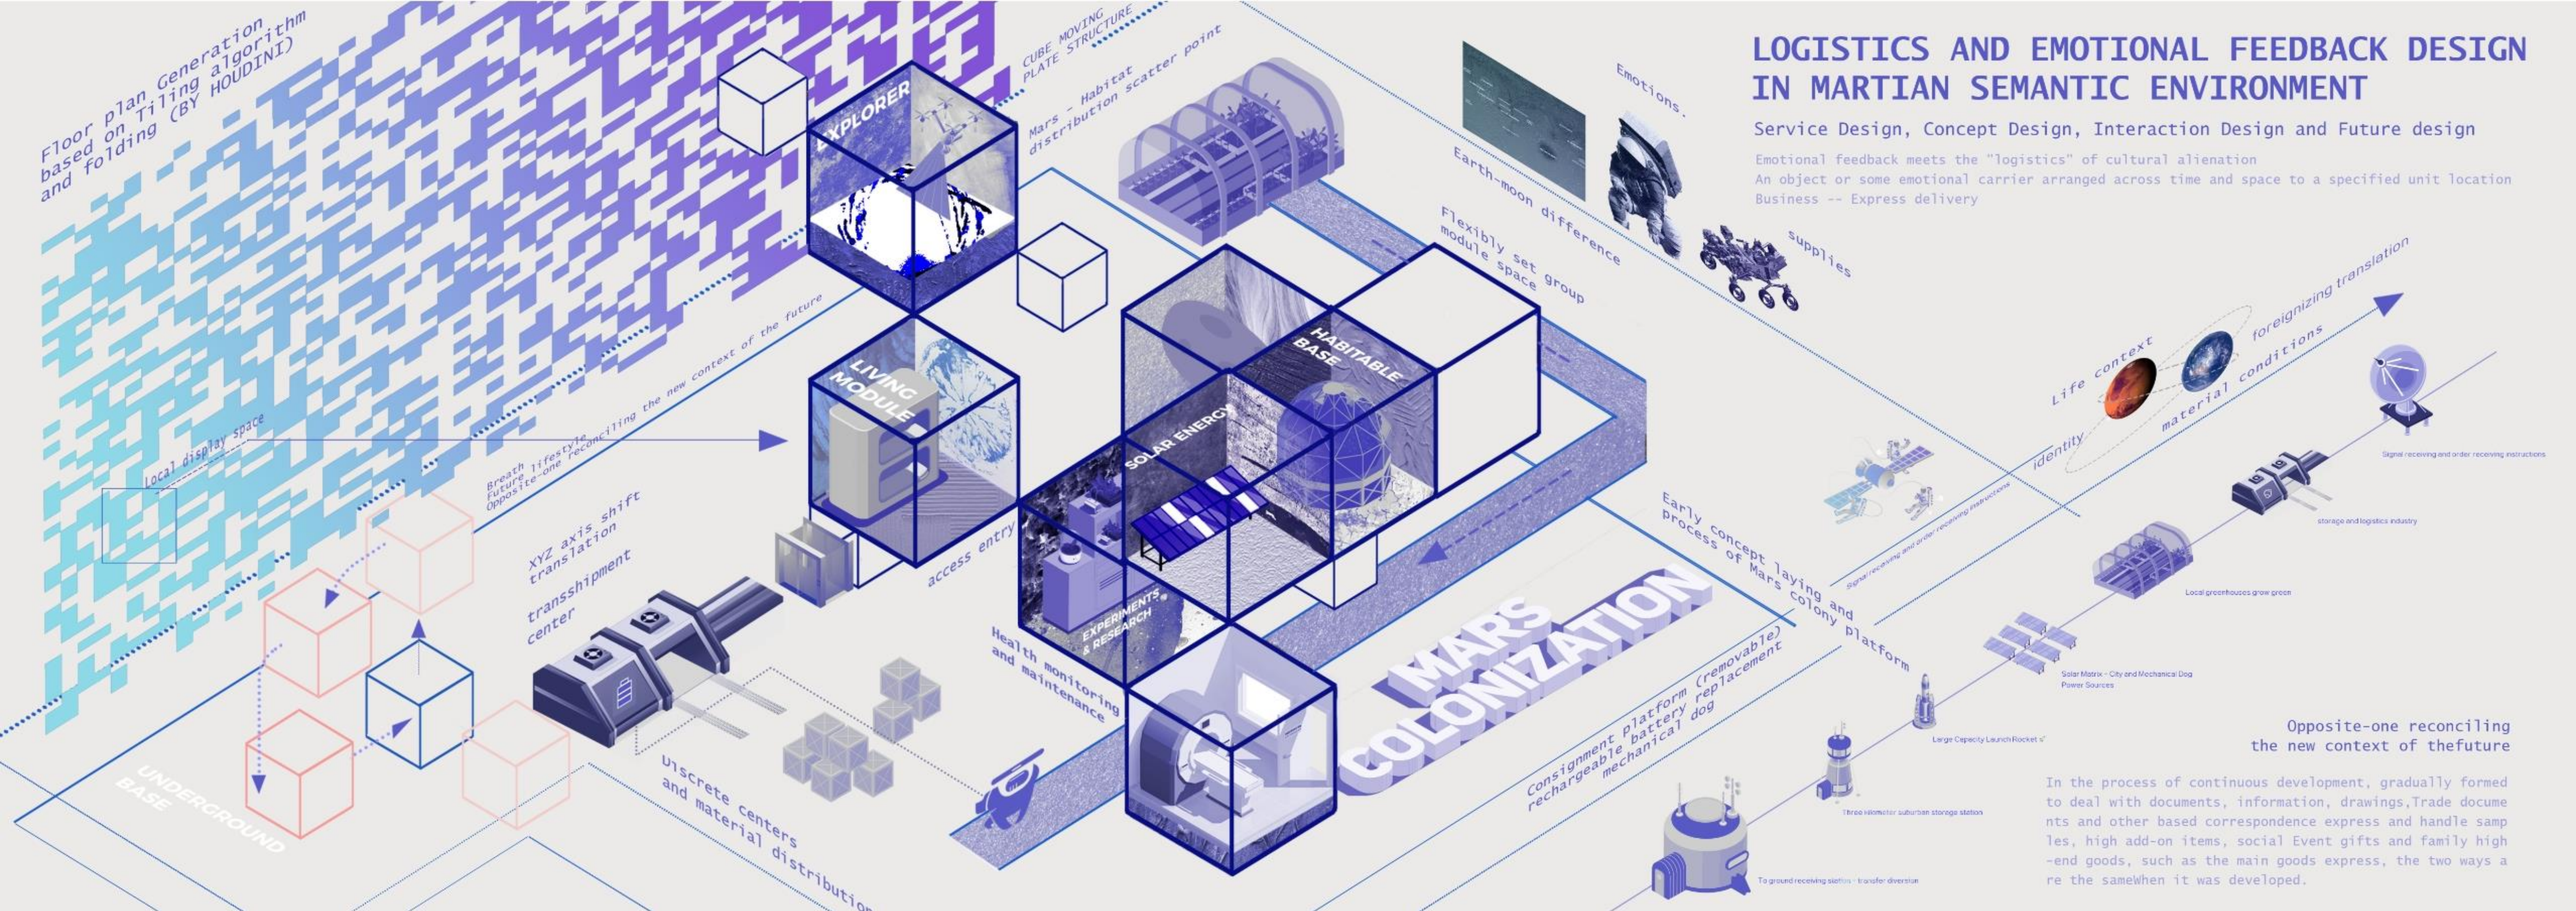
design

LOGISTICS AND EMOTIONAL FEEDBACK DESIGN IN MARTIAN SEMANTIC ENVIRONMENT

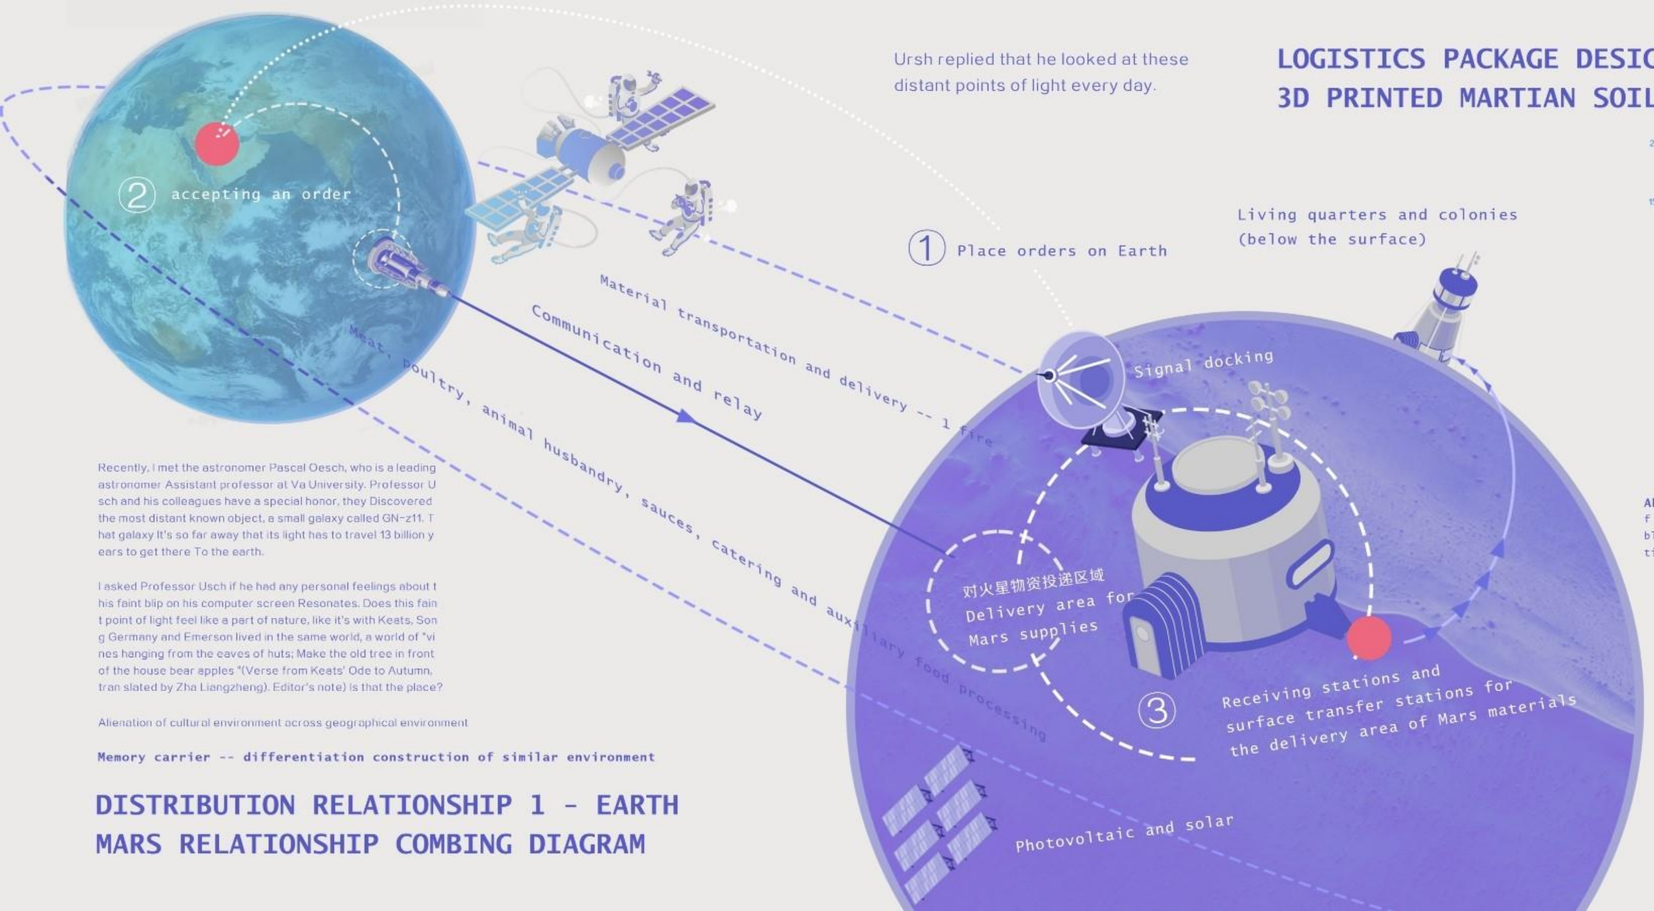
Service Design, Concept Design, Interaction Design and Future design

Emotional feedback meets the "logistics" of cultural alienation
An object or some emotional carrier arranged across time and space to a specified unit location
Business -- Express delivery



Opposite-one reconciling the new context of thefuture

In the process of continuous development, gradually formed to deal with documents, information, drawings,Trade documents and other based correspondence express and handle samples, high add-on items, social Event gifts and family high-end goods, such as the main goods express, the two ways are the sameWhen it was developed.



Ursh replied that he looked at these distant points of light every day.

Recently, I met the astronomer Pascal Oesch, who is a leading astronomer Assistant professor at Va University. Professor U sch and his colleagues have a special honor, they Discovered the most distant known object, a small galaxy called GN-z11. T hat galaxy It's so far away that its light has to travel 13 billion y ears to get there To the earth.

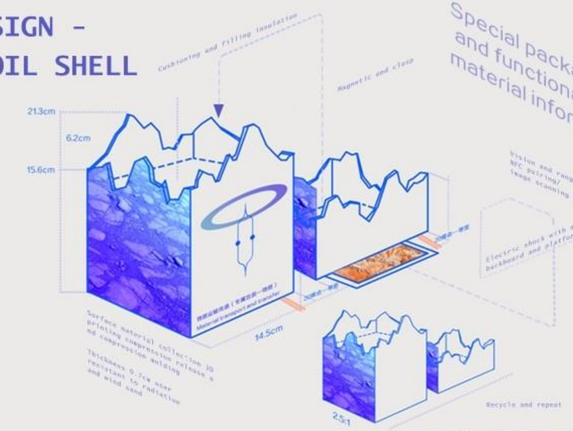
I asked Professor Usch if he had any personal feelings about t his faint blip on his computer screen Resonates. Does this fain t point of light feel like a part of nature, like it's with Keats, Son g Germany and Emerson lived in the same world, a world of "vi nes hanging from the eaves of huts; Make the old tree in front of the house bear apples "(Verse from Keats' Ode to Autumn, tran slated by Zha Liangzheng). Editor's note) is that the place?

Alienation of cultural environment across geographical environment

Memory carrier -- differentiation construction of similar environment

DISTRIBUTION RELATIONSHIP 1 - EARTH MARS RELATIONSHIP COMBING DIAGRAM

LOGISTICS PACKAGE DESIGN - 3D PRINTED MARTIAN SOIL SHELL



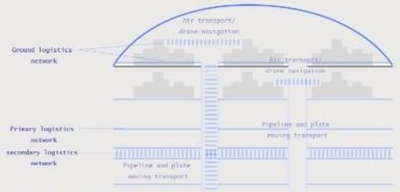
Special packaging materials and functional separation for material information emotional logistics

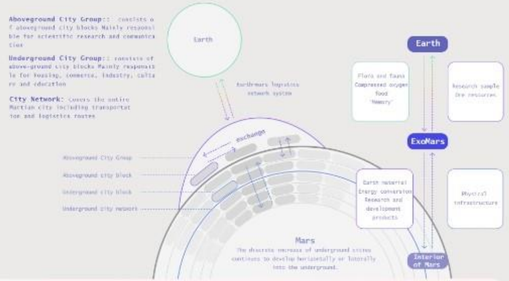
Aboveground City Group:: consists o f aboveground city blocks Mainly responsi ble for scientific research and communica tion

Underground City Group:: consists of above-ground city blocks Mainly responsib le for housing, commerce, industry, cultu re and education

City Network: Covers the entire Martian city including transportat ion and logistics routes

For communication problems in the Martian environment: communication delay between the Earth and Mars, relay program to compensate for the difference, assist surface storms and magneti c storms affect communication problems, recompile design,can be carried around, and simplify the interaction mode, touch and phy sical press can betion





EARTH DELIVERY SERVICE COMPARISON/ MARS DELIVERY SERVICE COMPARISON

Dismantling the Earth delivery service model

Online tool	Online business platforms and individual sales
express packaging	Carton packaging, foam packaging, wood packaging, inflatable packaging
mode of distribution	Courier, Courier car, drone/car delivery, air, water transport
Delivery content	Food, clothing, housing, transportation and entertainment
service process	1. Open the mobile phone purchase software 2. Purchase and order 3. Pay 4. Wait for the merchant delivery5. Notice of arrival 6. Packaging 7. Delivery station 8. One kilometer delivery 9. Pick up and confirm receipt 10. Service evaluation 11. Finished

Mars Express service migration

Online tool	The headset, MR
express packaging	New flexible 3d printing material, rental box form
mode of distribution	Plate movement pipeline transportation, Mars delivery trucks, drones
Delivery content	Food, clothing, housing, transportation and recreation - oxygen/water rationing system content
service process	Mixed reality is presented, artificial intelligence is assisted in pur chasing - voice and brain wave control an order - artificial intellige nce robots choose the best delivery methods - robot dogs, drones, Mars express cars delivered to the home - receiving - artificial intelligen ce settlement - evaluation is over The whole process does not require a person to operate, a person only needs to give instructions

Ideology: idealism Kant, Descartes, Heidegger, first-person deduction of existentialism

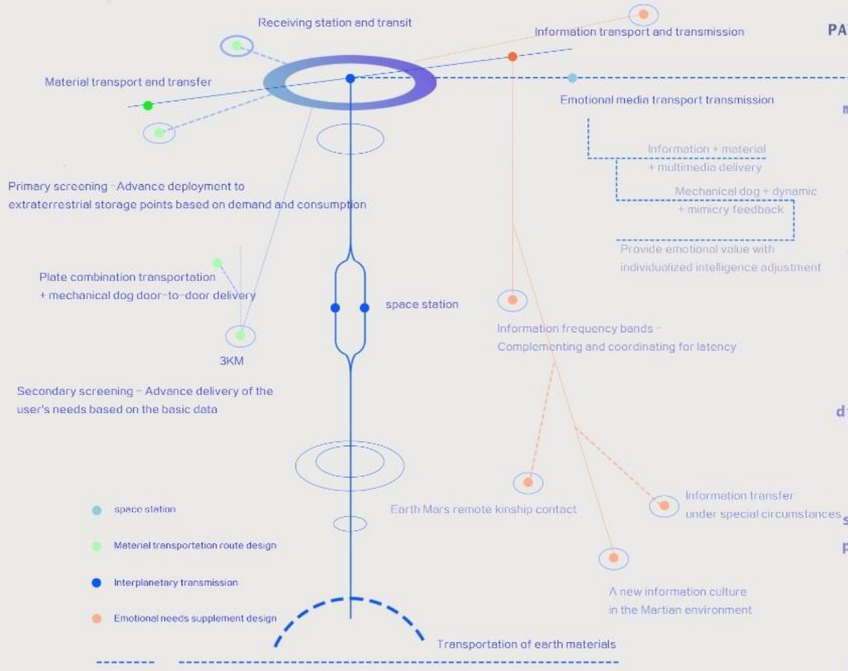
Methodology: Deconstruction and world simulation under semantic cultural differences

Worldview: The living space of the heterogeneous other side (the "I" in Martian environmental semantics)

Considering the geographical differences between Mars and Earth, especially in terms of gravity And hydrology is characterized by differences in the geographic al environment, high winds, and no surface Liquid water and attached plants caus e soil erosion and wind heat invasion The corrosion relationship will be extremely prominent

This requires researchers to work with living quarters, research institutes, and c ouriers Consideration and research of diversion center and surface orbit beddin g Further steps must be taken to ensure safety, scientificity and maintenance life span

Final screening - Individual requirements can be deployed and exchanged based on large semantic algorithms



Memory carrier -- differentiation
construction of similar environment

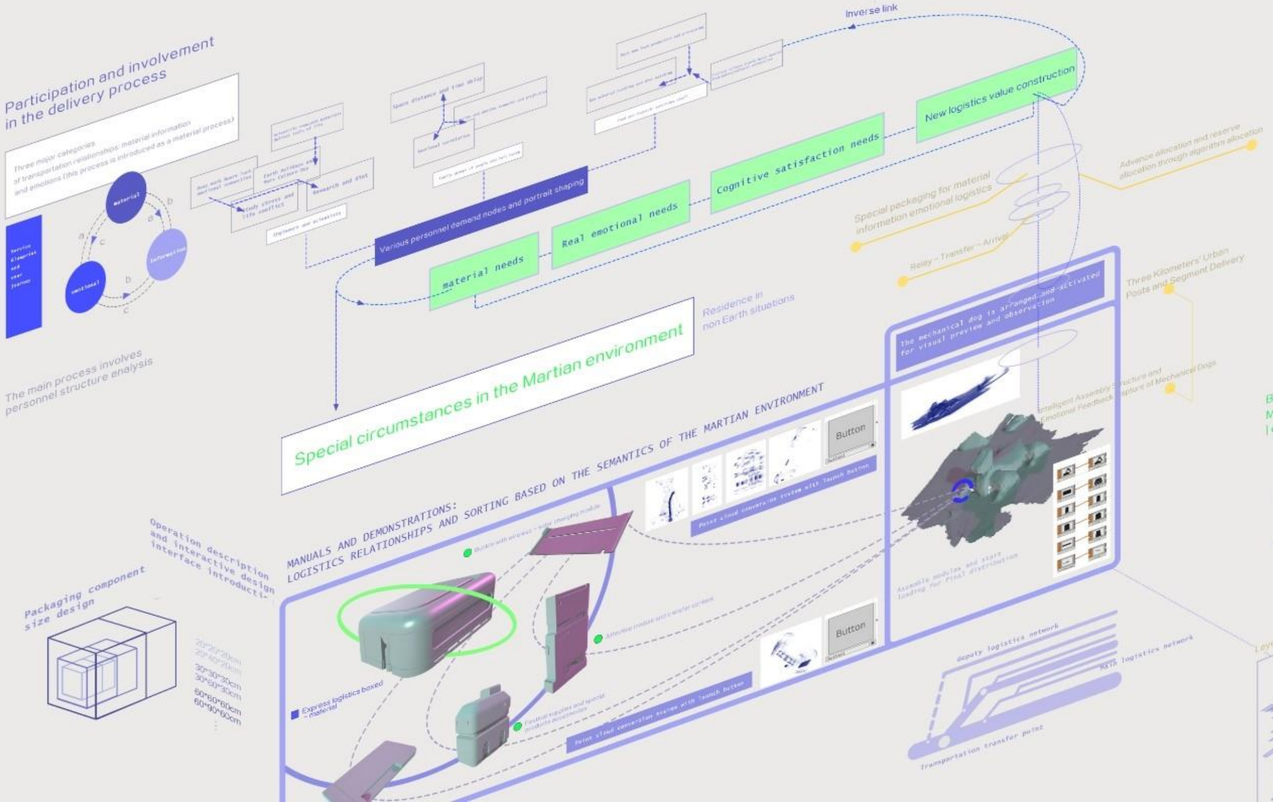
DISTRIBUTION RELATION 2 - DISTRIBUTION PATH BASED ON MARS ENVIRONMENTAL SEMANTICS

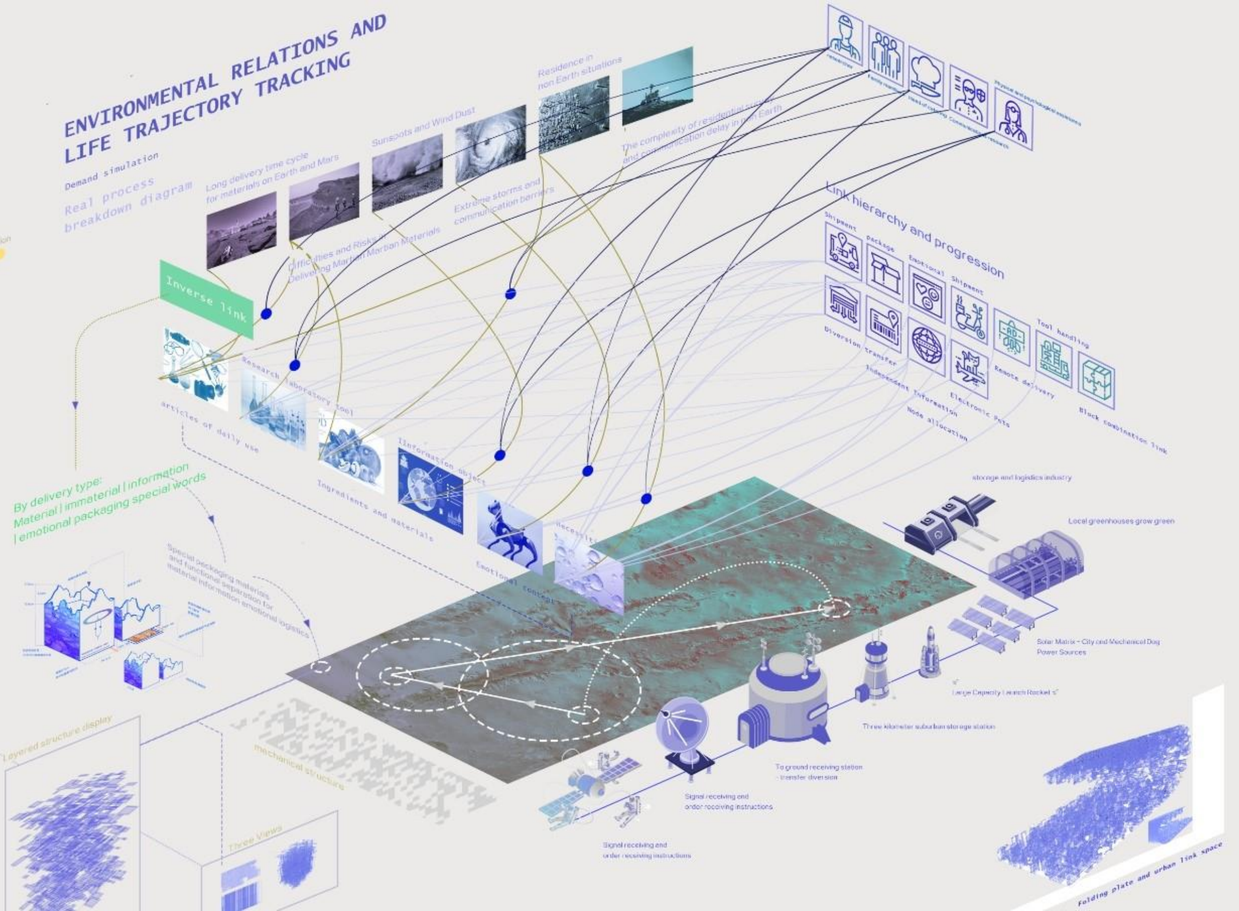
PATH DESIGN

- material desire
- latency time
- demand difference
- specific products
- culture dependent

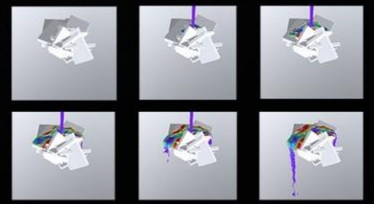
For facial recognition
Express emotional compensation

DISTRIBUTION RELATIONSHIP 4 - COMPLETE USER JOURNEY DIAGRAM ANALYSIS AND PARTICIPATION PROCESS PATTERN ANALYSIS (MAINLY MATERIAL DELIVERY)



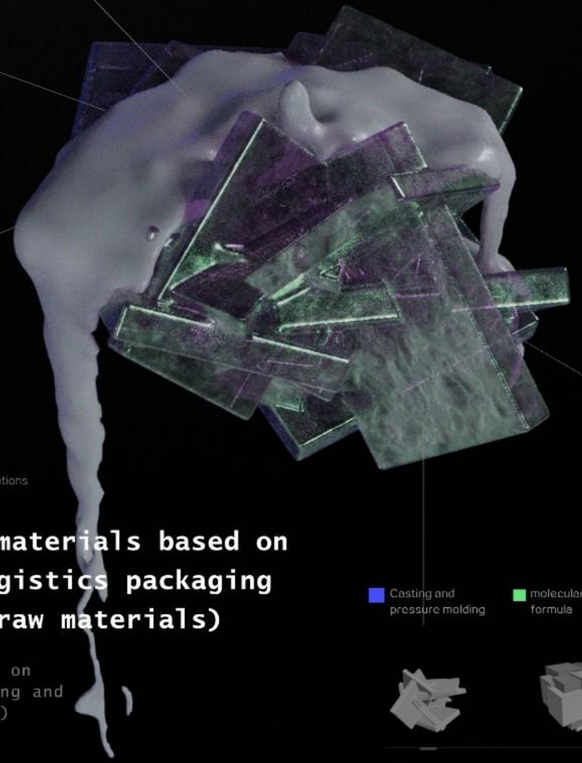


Material tape-out
curing and slicing



Laboratory simulations
and Fluid shaping

Renderings - Structure
Generation Unfolded



Casting and pressure molding | molecular structural formula | Atomic structure | Structure spread out | High temperature fluid test

Making recycled 3D printing materials based on Martian surface materials Logistics packaging and general transport plate raw materials)

Making circular 3D printing materials based on Martian surface materials Logistics packaging and general transportation sector raw materials)

CHAPTER 3: ANTI-UTOPIA AND INFORMATION TO SAVE ITSELF

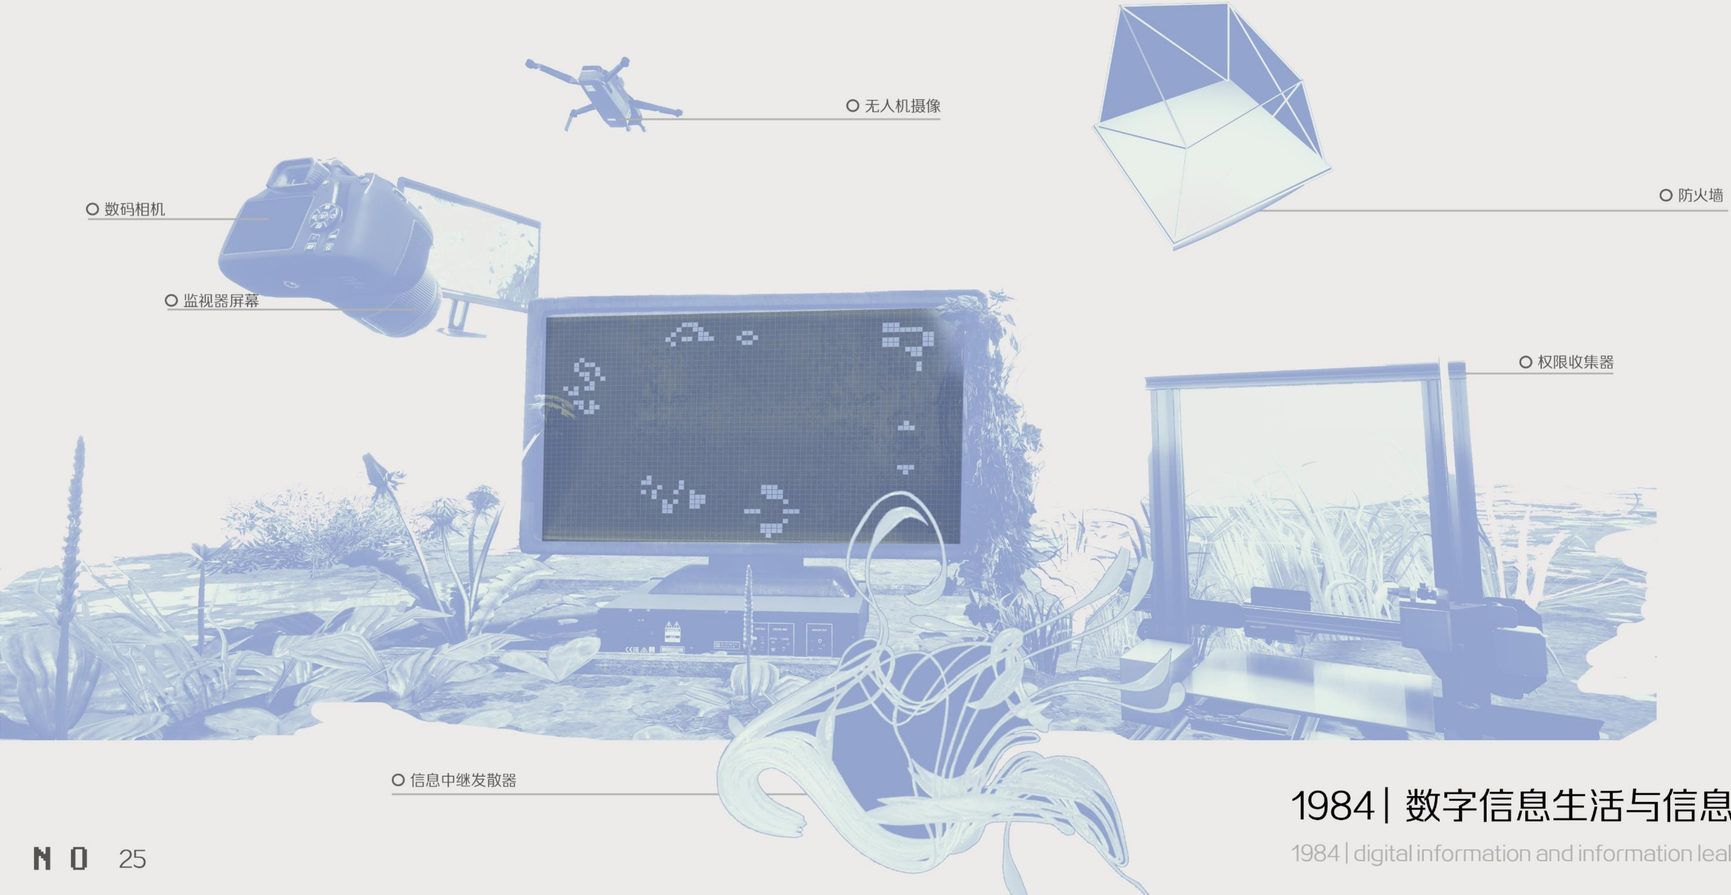
美丽新世界 | 1984

Brave New World | Big Brother Is Watching you at everytime

影像数据 | image data

自然反馈 | Natural feedback

机械物理 | Mechanical and physical



NO 1984 | 信息茧房

01 1984 | information cocoons

1.手机摄像头恐惧症

个人信息的使用、分享，访问，对信息如何被使用及分享的选择权、清除权等等。企业或机构需要一个综合的隐私保护框架来确保所有的隐私准则被囊括在内，依据并执行。下面是一些主流的，广泛得到认可的隐私框架：

- 经合组织（OECD）隐私保护准则（2013更新）
- AICPA/CICA公认隐私保护准则（GAPP）
- 美国公平信息实践准则（FIPs）
- 亚太经合组织（APEC）隐私保护框架
- 澳大利亚国家隐私保护准则

上述隐私政策实用有效，而且已经得到良好的实施，是非常不错的参考资料。尤其是OECD和GAPP，在隐私影响评估方面很有借鉴意义。

2.网络消费内容身份信息信息曝光几乎无法回避

隐私问题密切相关的大数据分析和物联网，目前的隐私法并没有覆盖到如此宽泛的隐私风险领域，但我们知道，在这些领域存在着许多个人信息的隐患。粗略的估计，隐私法顶多只涵盖了50%到60%的隐私风险。

02 1984 | A database of memories

app权限介入 → 优秀内容推送 / 身份信息被采集

1984 | 数字信息生活与信息泄漏安全的临界点

1984 | digital information and information leakage safety critical point

1.互联网没有“记忆”

从国际经济的视角看，互联网经济有一个前所未见的特点，天然具有极强的跨关税边界能力。现在智能手机在所有国家都快速普及，诱导普通人在全球的互联网平台上寻找服务，购买商品。能主导平台产业的国家，必然会吸引更多的贸易，产生更多的就业机会。

因此，“记忆”在此处对应的是过量信息造成的个人更新信息的能力和需求面临人类历史上绝无仅有的强度。

2.互联网也“有”记忆

现在所有的实体经济工厂，产业升级的前提都是掌握更多的信息，让机器能输出更多的信息，或者是让机器通过网络和其他机器交换信息。现在各大互联网公司努力推广的“云”服务，最主要的客户并不是电商或者游戏行业，而是各行各业的工厂。完全没有必要担心发展信息产业、发展互联网产业会挤占实体经济的资源。
